Journal of Bacteriology

INDEX OF AUTHORS[1]

Adams, J. N., 162
Adye, J. C., 780
Ajl, S., 154
Akers, J., 327
Alexander, J. K., 903
Altenbern, R. A., 586, 762
Anagnostopoulos, C., 741
Anderson, R. L., 130, 139
Appleman, M. D., 715
Arnott, D. A., 819
Aronson, M., 704
Asaki, K., 160
Azukas, J. J., 189

Backus, E. J., 70
Bacon, D. F., 786
Bailey, Joy L., 845
Balandrano, Dora, 366
Barksdale, L., 527
Barkulis, S. S., 509
Barnes, Evelyn C., 147
Batt, R. D., 59
Bayne, H. G., 118, 126
Ben-Efraim, S., 704
Benenson, A. S., 794
Berk, R. S., 459
Berman, S., 794
Beswick, Doris E., 157
Biberstein, E. L., 380
Bichowsky-Slomnicki, Leah, 704
Biegeleisen, J. Z., Jr., 990
Bienvenu, R. J., Jr., 684
Blackford, Virginia L., 747
Bojalil, L. F., 338
Bond, T. J., 327
Borasky, R., 311
Bradley, S. G., 303
Brady, R. J., 725
Braun, W., 503
Brock, M. Louise, 212
Brock, T. D., 212
Brooke, M. S., 755
Brosbe, E. A., 979
Brown, A., 20
Brown, T. McP., 500
Bush, G. L., 267

Caffrey, Ruth, 918
Camien, M. N., 163
Campbell, J. J. R., 721
Canale-Parola, E., 311
Carski, T. R., 626
Casas-Campillo, C., 366
Cerbon, J., 338
Chan, E. C. S., 725
Chapman, G. B., 195, 267
Clark, H. W., 500
Clark, J. B., 524
Clifton, C. E., 284
Cole, G., 794
Colmer, A. R., 800, 1009
Conover, Margaret J., 36, 44
Converse, J. L., 226
Costilow, R. N., 189
Creevy, D. C., 303
Csoka, R., 1008

Davies, M. C., 70
Delwiche, E. A., 416
Demain, A. L., 147
Doi, R. H., 51, 642
Dolman, C. E., 819
Dukes, C. D., 277
Dunn, M. S., 163

Eaton, N. R., 918
Eisler, D. M., 241
Engel, M. S., 833
Englesberg, E., 996
Esselmann, Marie T., 939
Ezekiel, D. H., 319

Faine, S., 159
Faust, Lois, 99
Ferguson, W. W., 474
Finegold, S. M., 636
Foster, J. W., 768
Fowler, Audree V., 163
Fowler, R. C., 500
Frady, Janice, 524
Frazier, W. C., 353, 359, 401, 409
Freeman, N. L., 156
Friedman, Lorraine, 550
Fukasawa, T., 669, 679
Fukui, G. M., 649, 656
Füzi, M., 155, 1008

Gaines, S., 924
Galarza, A., 366
Garber, E. D., 974
Gardner, H. L., 277
Garmise, L., 527
Geating, J. A., 226
Gerhart, J. C., 755
Gesner, B. M., 595
Gerwing, Julia, 819
Gibbons, R. J., 614
Gibbs, M., 107
Gills, Marjorie, 380

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
January	1/27/61	1–164
February	3/ 3/61	165–329
March	4/ 6/61	331–505
April	4/24/61	507–668
May	5/26/61	669–836
June	6/30/61	837–1024

INDEX OF SUBJECTS[1]

Acetate, incorporation of, by *Torulopsis utilis*, 178
Acetyl-L-isoleucine, production of, by *Mycobacterium ranae*, 163
Acetyl-L-leucine, production of, by *Mycobacterium ranae*, 163
Achromobacter species, physiology of nitrogen fixation by, 568
Acid, *see* Ribonucleic
—(s), *see* Sorbic
Acridine dyes, elimination of resistance factors with, 679
Adenosine triphosphate: phosphate exchange, relation of biotin to, 505
Aerobacter aerogenes, cerium uptake by, 733
— —, ethanol dehydrogenase in, 852
— —, lysis of, by lysozyme, 482, 492
— —, water requirements of, 353, 401, 409
Agarbacterium alginicum, taxonomic designation of, 162
Agglutination, detection of brucellae by, 900
L-Alanine, effect of, on spore germination of *Bacillus megaterium*, 204
Alanine, formation of, from ribose, by *Microbacterium lacticum*, 246
Alcaligenes faecalis, degradation of ergothioneine by, 715
— —, gum formed by, 800
Alcoholic fermentation, inhibition of, by sorbic acid, 189
Alginomonas alginica, synonym of *Agarbacterium alginicum*, 162
Alkaline phosphatase in *Escherichia coli*, 835
Alkaloids, rauwolfia, microbial transformation of, 504
Alkyl primary amines, germination of spores with, 768
Alloxanic acid, metabolism of, 755
Amines, alkyl primary, germination of spores with, 768
Amino acids, effect of, on formation of bacitracin by *Bacillus licheniformis*, 986
3-Amino-1,2,4-triazole, inhibition of *Escherichia coli* by, 327
Aminopterin inhibition of yeast growth, 730
Aminotriazole, inhibition of *Escherichia coli* by, 327
Ammonia, production of, during endogenous respiration, 721
Anthranilic acid, effect of, on tryptophan synthetase, 81
— ribonucleotide in *Escherichia coli*, 81
Antibiotic therapy in experimental bacterial infections in mice, 233
—(s), distribution of streptomycetes that produce, 218
—, effect of, on production of diphtheria toxin, 527
Antibody, fluorescent, detection of brucellae by, 900
— for *Corynebacterium diphtheriae*, effect of, on phage production, 394
Anticancer agents, resistance of *Escherichia coli* to, 419
Antigen, H, of *Salmonella typhosa*, 924
—(s) of *Escherichia coli*, 346
— — *Listeria monocytogenes*, 155
— — *Pasteurella pestis*, 704
— — pseudomonads, 28
Antigenic relationships of spores of *Bacillus cereus* and *Bacillus anthracis*, 622
Antimicrobial properties of dimethoxy progesterone, 366
Antitumor compounds, effect of, on *Escherichia coli*, 258
Aquatic myxobacterium, *Cytophaga succinicans* sp. n., 130, 139
Arabinose negative mutants of *Escherichia coli*, 996
Arsine production by *Trichophyton rubrum*, 157
Aspartate and aminopterin inhibition of yeast growth, 730
Aspergillus niger, role of polyphosphate and phospholipid in germinating spores of, 10
Assimilation of amino acids by salmonellae, 118, 126
— — glucose by *Bacillus cereus*, 277
Authors, note to, 507
Auxotrophs of *Salmonella typhimurium*, antagonisms between purines in, 331
8-Azaguanine, inhibition of *Salmonella typhimurium* by, 331
Azaserine, resistance of *Escherichia coli* to, 419
—, reversal of, by phenylalanine, 212
Azotobacter agilis, cysts of, 946

Bacillus anthracis spores as antigens, 622
— *cereus*, assimilation of glucose by, 277
— —, cerium uptake by, 733
— — spores as antigens, 622
— — —, dipicolinic acid in, 642
— *entomocidus* spores as antigens, 622
— *licheniformis*, formation of bacitracin by protoplasts of, 986
— *megaterium*, cerium uptake by, 733
— —, chromatin bodies in, 319
— —, spheroplasts of, 160
— — spores, germination of, 204, 768
— —, synthesis of ribonucleic acid, by, 319

[1] All entries indexed to first page of article.

— *sphaericus*, sporulation of, 725
— *subtilis*, ammonia production by, during endogenous respiration, 721
— —, mutants of, effects of heat on, 111
— —, — —, — — nitrous acid on, 111
— —, secondary colony formation by, on eosine methylene blue agar, 887
— —, transformation in, 741, 823
— *thuringiensis* spores as antigens, 622
Bacitracin, formation of, by protoplasts of *Bacillus licheniformis*, 986
Bacteria, symbiotic, of the cockroach, electron microscopy of, 267
Bacterial oxidation of benzene, 425
— — — catechol, 425
Bacteriolysis of *Enterobacteriaceae*, 482, 492
Bacteriophage, T2H, effect of, on biosynthesis of pentoses in, 845
Bacteroides melaninogenicus, hydrolysis of collagen by, 614
—, production of heparinase by, 595
Beggiatoa alba, cultivation of, 99
Benzene, bacterial oxidation of, 425
Biosynthesis of pentoses in *Escherichia coli*, 837, 845
Biotin and aminopterin inhibition of yeast growth, 730
— in *Lactobacillus arabinosus*, 65
—, relation of, to phosphate:adenosine triphosphate exchange, 505
Botulinum toxin, phagocytosis of staphylococci by leukocytes in presence of, 156
— —, type E, purification and activation of, 819
Brucella abortus, detection of, by fluorescent antibody, 990
— —, phage susceptibility and colonial phenotype of, 503
— *melitensis*, detection of, by fluorescent antibody, 990
— *suis*, detection of, by fluorescent antibody, 990
Brucellacidal activity of heated rabbit serum, 684

Calcium, effect of, on growth *Pasteurella pestis*, 605
Candida albicans, pathogenicity of, 550
— *reukaufii*, pathogenicity of, 550
— *robusta*, pathogenicity of, 550
— species, differentiation of, on molybdate agar, 869
— —, pathogenicity of, 550
— *stellatoidea*, α-glucosidase synthesis in, 303
Capreolimycin, use of, in experimental bacterial infections in mice, 233
Capsular polysaccharide, pathway of biosynthesis of, 688, 694
Carboligase, glyoxylic acid, in *Escherichia coli*, 509
Carbon dioxide, effect of, on water requirements of bacteria, 401
— — production of *Escherichia coli*, 172
Catabolism of pyrimidine in *Nocardia corallina*, 59
Catalase in *Haemophilus* species, 380
— of *Pediococcus cerevisiae*, 416
Catechol, bacterial oxidation of, 425
Cell wall of microcyst of *Myxococcus xanthus*, 780
— — synthesis in *Streptococcus faecalis*, 36
Cellobiose phosphorylase from *Clostridium thermocellum*, characteristics of, 903
Cellulose ion exchange column, purification of botulinum toxin on, 819
—, production of, by *Sarcina ventriculi*, 311
Cerium uptake by microorganisms, 733
Chick embryo, growth of meningopneumonitis virus in, 208
Chloramphenicol, drug resistance of *Enterobacteriaceae* to, 669, 679
—, use of, in experimental bacterial infections in mice, 233
1-Chloroethyl-3-nitro-1-nitrosoguanidine, resistance of *Escherichia coli* to, 419
Chromatin bodies in *Bacillus megaterium*, 319
Classification of nitrifying bacteria, 833
Clostridium botulinum type E toxin, 819
— *thermocellum*, cellobiose phosphorylase from, 903
CO_2-dependent fermentation of glucose by *Cytophaga succinicans*, 130, 139
Coagulase-positive staphylococci, medium for, 636
Coagulation of human plasma by *Pasteurella pestis*, 241
Coccidioides immitis, virulence assay of, in eggs, 226
Cockroach, symbiotic bacteria of, electron microscopy of, 267
Collagen, hydrolysis of, by *Bacteroides melaninogenicus*, 614
Colonial phenotype and phage susceptibility of *Brucella abortus*, 503
Colony formation, secondary, by *Bacillus subtilis* on eosine methylene blue agar 887
Complement adsorption test for foot and mouth disease, 478
Conglutinating test for foot and mouth disease, 478
Conjugation, transfer of resistance factors by, 669
Contributors, note to, 507
Corynebacterium diphtheriae phage, effect of antibody on production of, 394
— — —, inhibitor of, 387, 394
— —, toxinogeny in, 527
Coxiella burnetii, growth of, in monolayer cell cultures, 741
— —, production of Q fever vaccine from, 794
Cupric sulfate action of, on recovery of variants of *Escherichia coli*, 448
Curvularia lunata, antimicrobial properties of dimethoxy progesterone for, 366
Cyclohydrolase of *Diplococcus glycinophilus*, 541

Cysteine, inhibition of sulfate accumulation in *Penicillium chrysogenum* by, 91
Cysts of *Azotobacter agilis*, 946
Cytochrome *c* reductase in *Bacillus cereus*, 51
— pigments in *Bacillus cereus*, 51
— — — spores of *Bacillus cereus*, 51
— production by *Vibrio succinogenes* sp. n., 911
Cytopathology of Venezuelan equine encephalomyelitis virus in L cells, 20
Cytophaga succinicans sp n., characteristics of, 130, 139

Dark-field illumination, principles of, 150
Dehydrogenase, ethanol, in *Aerobacter aerogenes*, 852
Deoxycorticosterone, growth regulation of *Penicillium puberulum* by, 803
Deoxyribokinase in *Salmonella schottmuelleri*, 328
Deoxyribonucleic acid, synthesis of, by *Escherichia coli*, 918
Deoxyribose, biosynthesis of, in *Escherichia coli*, 837, 845
—, effect of bacteriophage on biosynthesis of, in *Escherichia coli*, 845
Diaphorase in *Bacillus cereus*, 51
Dihydrostreptomycin, drug resistance of *Enterobacteriaceae* to, 669, 679
—, effect of, on *Escherichia coli*, 918
Dimethoxy progesterone, antimicrobial properties of, 366
Dimorphism of *Sporotrichum schenckii*, 464
Diphosphopyridine nucleotide oxidase in spores, 642
Diphtheria bacillus, toxinogeny in, 527
—phage inhibitor, 387, 394
— toxin production, 527
Dipicolinic acid in spores, 642
Diplococcus glycinophilus, cyclohydrolase of, 541
— —, metabolism of glycine by, 541
Dissimilation of glucose by *Escherichia coli*, 107
— — — — Rhizopus, 1
Drug resistance, episome-mediated transfer of, in *Enterobacteriaceae*, 669, 679
Dyes, acridine, elimination of resistance factors with, 679

Eggs, embryonated, growth of meningopneumonitis virus in, 208
—, use of, for virulence assay of *Coccidioides immitis*, 226
El Tor vibrios, phage susceptibility of, 830
Electron micrograph(s) of cysts of *Azotobacter agilis*, 946
— — — myxocyst of *Myxococcus xanthus*, 780
Electron microscopy of spheroplast of *Bacillus megaterium*, 160
— — — *Spirillum* species, 195
— — — streptomyces spores, 70
Electrophoretic mobility of *Pasteurella pestis*, 704
Embden-Meyerhof-Parnas pathway of glucose metabolism in Rhizopus, 1
Enolase, inhibition of, by sorbic acid, 189
Enrichment of *Beggiatoa alba*, 99
Enterobacteriaceae, bacteriolysis of, 482, 492
—, episome-mediated transfer of drug resistance in, 669, 679
Enzyme(s), carboligase, glyoxylic acid, in *Escherichia coli*, 509
—, cellobiose phosphorylase, characteristics of, 903
—, collagenase, in *Bacteroides melaninogenicus*, 614
—, cyclohydrolase, of *Diplococcus glycinophilus*, 541
—, ethanol dehydrogenase, in *Aerobacter aerogenes*, 852
—, heparinase, production of, by bacteroides, 595
—, lecithinase, production of, by gram-negative bacteria, 939
— of arabinose negative mutants of *Escherichia coli*, 996
—, penicillinase, formation of, in *Staphylococcus aureus*, 895
—, tryptophan synthetase, in *Neurospora crassa*, 955, 964
—, *see also* Cytochrome *c* reductase, Deoxyribokinase, Diaphorase, Flavoprotein oxidase, α-Glucosidase, Isocitritase, Malate synthetase, Ornithine transcarbamylase, Phosphatase, Phosphofructokinase, Transaldolase, Transketolase, Tryptophan synthetase, Uracil-thymine oxidase
Eosine methylene blue agar, secondary colony formation by *Bacillus subtilis* on, 887
Episome-mediated transfer of drug resistance in *Enterobacteriaceae*, 669, 679
Equine encephalomyelitis virus, Venezuelan, growth of, in L cells, 20
Ergothioneine, degradation of, by *Alcaligenes faecalis*, 715
Erwinia atroseptica, effect of, on sporulation of *Bacillus sphaericus*, 725
— *carotovora*, cerium uptake by, 733
Erythromycin, use of, in experimental bacterial infections in mice, 233
Escherichia coli A antigen, 346
— —, alkaline phosphatase in, 835
— —, ammonia production by, during endogenous respiration, 721
— —, anthranilic ribonucleotide in, 81
— —, arabinose negative mutants of, 996
— — auxotroph, reversion of, 786
— —, biosynthesis of pentoses in, 837, 845
— —, carbon dioxide production of, 172
— —, cerium uptake by, 733
— —, dissimilation of glucose by, 107

— —, drug resistance of, 669, 679
— —, effect of azaserine on, 212
— —, — — bacteriophage on biosynthesis of pentoses in, 845
— —, — — dihydrostreptomycin on, 918
— —, — — ethyl sulfate on permeability of, 573
— —, filament formation in, 258
— —, fusion of nuclei in, 667
— —, glyoxylic acid carboligase in, 509
— —, heat output of, 172
— —, indole-3-glycerol phosphate in, 81
— —, inhibition of, by 3-amino-1,2,4-triazole, 327
— —, lysis of, by lysozyme, 482, 492
— —, mutants of, 835
— —, — —, effect of heat and nitrous acid on, 111
— —, ornithine transcarbamylase in, 236
— —, oxygen absorption of, 172
— —, recovery of, irradiated with ultraviolet light, 288
— —, — — variants of, action of copper in, 448
— —, resistance of, to anticancer agents, 419
— —, — —, — 1-methyl-3-nitro-1-nitrosoguanidine, 258
— —, tryptophan synthetase in, 81
Estradiol-17β, growth regulation of *Penicillium puberulum* by, 803
Ethanol dehydrogenase in *Aerobacter aerogenes*, 852
Ethyl sulfate effect on permeability, 573

Filament formation in *Escherichia coli*, 258
Filamentous organism, anaerobic oral, 661
Flagellation in *Spirillum* species, electron microscopy of, 195
Flavoprotein oxidase in *Bacillus cereus*, 51
Fluorescent antibody, detection of Brucellae by, 990
Foot and mouth disease, conglutinating adsorption test for, 478
Fusion of bacterial nuclei, 667

Genetics of L forms of *Salmonella paratyphi*, 875
Germination of gacterial spores with alkyl primary amines, 768
— — spores of *Aspergillus niger*, role of polyphosphate and phospholipid in, 10
Glucose, assimilation of, by *Bacillus cereus*, 277
— dissimilation in *Escherichia coli*, 107
—, — of, by Rhizopus, 1
—, effect of, on spore germination of *Bacillus megaterium*, 204
— in capsular polysaccharide, 688, 694
—, metabolism of by *Cytophaga succinicans* sp. n., 130, 139
α-Glucosidase synthesis in *Candida stellatoidea*, 303
Glycine, metabolism of, by *Diplococcus glycinophilus*, 541
Glyoxylic acid carboligase in *Escherichia coli*, 509
Gum formed by *Alcaligenes faecalis*, 809

H Antigen of *Salmonella typhosa*, 924
Haemophilus influenzae, catalase in, 380
— *parainfluenzae*, catalase in, 380
— species, catalase in, 380
— *vaginalis*, identification of, 277
Heat, effect of, on mutant formation in *Escherichia coli*, 111
— output of *Escherichia coli*, 172
— — — thermophiles, 165
Hemin, effect of, on catalase in *Haemophilus* species, 380
Hepinarinase, production of, by bacteroides, 595
Hypoxanthine, effect of, on growth of *Salmonella typhimurium*, 331

Indole-3-glycerol phosphate in *Escherichia coli*, 81
Inhibitor for diphtheria phage, effect of oleic acid on production of, 387, 394
Intracellular growths in *Mycobacterium tuberculosis*, 979
Iron, effect of, on production of diphtheria toxin, 527
Irradiation of *Escherichia coli* with ultraviolet light, 288
Isocitritase in *Tetrahymena pyriformis*, 154
Isomerase, arabinose, in *Escherichia coli*, 996

Kanamycin resistance in a phage type of staphylococcus, 157
Klebsiella pneumoniae, resistance of, to lysozyme, 482

L Cells, cytopathology of Venezuelan equine encephalomyelitis virus in, 20
— —, growth of Venezuelan equine encephalomyelitis virus in, 20
L Form(s) of *Proteus mirabilis*, 586, 762, 812
— — — — —, reversion of, 762
— — — *Salmonella paratyphi*, 875
— — — staphylococci, 832
Lactobacillus arabinosus, biotin in, 65
— *casei*:*Saccharomyces carlsbergensis* interrelationships, 519
— *heterohiochi*, nutrition of, 147
— *plantarum*:*Saccharomyces carlsbergensis* interrelationships, 519
— *viridescens*, water requirements of, 359, 401, 409
—:yeast interrelationships, 519
Lecithinase production by gram-negative bacteria, 939
Leptospira andamani, differentiation of, 1008
— *semaranga*, differentiation of, 1008
Leptospirae, differentiation of, 1008
Leptotrichia dentium, characteristics of, 581

Leuconostoc mesenteroides, medium for, 1009
Leukocytes, phagocytosis of staphylococci by, in presence of botulinum toxin, 156
Listeria monocytogenes, antigen of, 155
Liver succinoxidase, effect of fractions of *Pseudomonas aeruginosa* on, 459
Lysis of gram-negative bacteria, 482, 492
— — *Streptococcus faecalis*, 36
Lysogenic *Salmonella typhosa* Vi-phage types, curing of, by ultraviolet, 474
Lysozyme, lysis of *Enterobacteriaceae* by, 482, 492
—, resistance of *Klebsiella pneumoniae* to, 482

Macromolecule synthesis in *Mycobacterium bovis*, 933
Malate, effect of, on water requirements of bacteria, 353, 359
— synthetase in *Tetrahymena pyriformis*, 154
Medium for coagulase-positive staphylococci, 636
— — Leuconostoc detection, 1009
Meningopneumonitis virus in chick embryo, growth of, 208
6-Mercaptopurine, effect of, on growth of *Salmonella typhimurium*, 331
Metabolism of amino acids by Salmonellae, 118, 126
— — *Diplococcus glycinophilus*, 541
Methionine, inhibition of sulfate accumulation in *Penicillium chrysogenum* by, 91
1-Methyl-3-nitro-1-nitrosoguanidine, resistance of *Escherichia coli* to, 258, 419
3-Methylanthranilic acid, effect of, on tryptophan synthetase, 81
Mice, experimental salmonellosis in, 863
Microbacterium lacticum, phosphofructokinase in, 246
— —, ribose 5-phosphate utilization in, 246
— —, transaldolase in, 246
— —, transketolase in, 246
Microbial transformation of rauwolfia alkaloids, 504
Microcolony brucellacidal test, 684
Microcyst of *Myxococcus xanthus*, 780
Microscopy of pleuropneumonia-like organisms, 500
Mitomycin, resistance of *Escherichia coli* to, 419
Moisture requirements of bacteria, 353, 359, 401, 409
Molybdate agar for differentiating yeasts, 869
Monolayer cell cultures, growth of *Coxiella burnetii* in, 741
Morphology of *Nitrosomonas europaea*, 833
Mouse monocytes, succinoxidase in, effect of fractions of *Pseudomonas aeruginosa* on, 459
Mucoid B forms of *Escherichia coli*, 346
Mutant(s), arabinose negative, of *Escherichia coli*, 996
— of *Bacillus subtilis*, effect of heat on, 111
— — — —, — — nitrous acid on, 111
— — *Escherichia coli*, 835
— — — —, effect of heat on, 111
— — — —, — — nitrous acid on, 111
— — — —, resistance of, to anticancer agents, 419
— — *Neurospora crassa*, characteristics of, 955, 964
Mycobacteria, nonpigmented, characteristics of, 338
—, —, taxonomy of, 338
Mycobacteriophage, physicochemical characterization of, 442
Mycobacterium bovis, macromolecule synthesis induced by sulfate deficiency in, 933
— *fortuitum*, characteristics of, 338
— *lacticola*, phage for, 442
— *ranae*, production of acetyl-L-isoleucine by, 163
— —, — — acetyl-L-leucine by, 163
— *rhodochrous*, oxidation of benzene by, 425
— *tuberculosis*, intracellular growths of, 979
— —, phage for, 442
Myxobacterium, *Cytophaga succinicans* sp. n., 130, 139
Myxococcus xanthus, microcyst of, 780

Nematospora coryli, cereum uptake by, 733
Neurospora crassa, tryptophan synthetase mutant of, 955, 964
New species: *Cytophaga succinicans*, characteristics of, 130, 139
— —: *Vibrio succinogenes* sp. n., 911
Nitrifying bacteria, classification of, 833
Nitrogen fixation by achromobacter, 568
— mustard, resistance of *Escherichia coli* to, 419
Nitromin, resistance of *Escherichia coli* to, 419
Nitrosomonas europaea, morphology of, 833
Nitrous acid, effect of, on mutant formation in *Escherichia coli*, 111
Nocardia corallina, photoprotection against X-ray inactivation in, 524
— —, pyrimidine catabolism in, 59
Note to contributors, 507
Novobiocin, use of, in experimental bacterial infections in mice, 233
Nuclei, fusion of bacterial, 667
Nucleotide level in *Saccharomyces cerevisiae*, effect of paludrine on, 831
Nutrition of *Beggiatoa alba*, 99
— — *Haemophilus vaginalis*, 277
— — *Lactobacillus heterohiochi*, 147
— — *Pasteurella pestis*, 605
— — *Pseudomonas indigofera*, 858
— — *Streptococcus faecalis*, 36

Oleic acid, effect of, on production of inhibitor for diphtheria-phage, 387, 394
Oral filamentous orgrnism, anaerobic, 661
— — —, characteristics of, 381

Ornithine transcarbamylase in *Escherichia coli*, 236
Oxidase, diphosphopyridine nucleotide, in spores, 642
—, flavoprotein, in *Bacillus cereus*, 51
—, uracil-thymine, in *Nocardia corallina*, 59
Oxygen absorption of *Escherichia coli*, 172
—, effect of, on water requirements of bacteria, 409

pH, effect of, on utilization of acetate by *Torulopsis utilis*, 178
—, — —, on water requirements of bacteria, 351, 359, 401, 409
Paludrine, effect of on nucleotide level in *Saccharomyces cerevisiae*, 831
Paracolobactrum species, lysis of, by lysozyme, 482
Pasteurella pestis, antigen of, 704
— —, coagulation of human plasma by, 241
— —, effect of temperature on virulence of, 649, 656
— —, nutrition and physiology of, 695
— —, virulence of, 704
— *tularensis*, phagocytosis of, 470
Pathogenicity of candida, 550
Pediococcus cerevisiae, catalase of, 416
Penicillin, production of L forms in *Salmonella paratyphi* by, 875
—, use of, in experimental bacterial infections in mice, 233
Penicillinase in *Staphylococcus aureus*, formation of, 895
Penicillium chrysogenum, sulfate accumulation in, 91
— *puberulum*, growth regulation in, by steroids, 803
Pentoses, biosynthesis of, in *Escherichia coli*, 837, 845
Permeability, effect of ethyl sulfate on, 573
Phage susceptibility and colonial phenotype of *Brucella abortus*, 503
— — of vibrios, 830
— type of staphylococcus, kanamycin resistance in, 157
—, *see* Mycobacteriophage
Phagocytosis of *Pasteurella tularensis*, 470
— — staphylococci by leukocytes in presence of botulinum toxin, 156
Phenylalanine, inhibition of bacitracin formation by, in *Bacillus licheniformis*, 986
—, reversal of azaserine by, 212
Phosphatase, alkaline, in *Escherichia coli*, 835
Phosphate:adenosine triphosphate exchange, relation of biotin to, 505
Phosphofructokinase, in *Microbacterium lacticum*, 246
Phospholipid, role of, in germinating spores of *Aspergillus niger*, 10
Phosphorus metabolism during germination of spores of *Aspergillus niger*, 10
Photoprotection against X-ray inactivation in *Nocardia corallina*, 524
Physiology of nitrogen fixation by achromobacter, 508
— — *Pasteurella pestis*, 695
Pigmentation of *Serratia marcescens*, 376
Pigments in *Serratia marcescens*, 376
Plasma, coagulation of human, by *Pasteurella pestis*, 241
Pleuropneumonia-like infections of tissue culture, 626
— organisms, preparation of, for microscopic study, 509
Poliovirus, growth of, in monkey ileum, 564
Polyphosphate, role of, in germinating spores of *Aspergillus niger*, 10
Polysaccharide, pathway of biosynthesis of capsular, 688, 694
Pressure, effect of, on water requirements of bacteria, 401
Progesterone analogues, antimicrobial properties of, 366
Proteus mirabilis, L forms of, 586, 762, 812
— —, reversion of L forms of, 762
— species, lysis of, by lysozyme, 482
— *vulgaris*, cereum uptake by, 733
Protoplasts, formation of bacitracin by, in *Bacillus licheniformis*, 986
Pseudomonadaceae, lecithinase production by, 939
Pseudomonas aeruginosa, ammonia production by, during endogenous respiration, 721
— —, antigens of, 28
— —, effect of fractions of, on succinoxidase, 459
— —, lecithinase production by, 939
— —, oxidation of benzene by, 425
— *aureofaciens*, antigens of, 28
— —, lecithinase production by, 939
— *caviae*, antigens of, 28
— —, lecithinase production by, 939
— *chlororaphis*, antigens of, 28
— —, lecithinase production by, 939
— *fluorescens*, ammonia production by, during endogenous respiration, 721
— —, antigens of, 28
— —, lecithinase production by, 939
— —, water requirements of, 401, 409
— *indigofera*, characteristics of, 858
— *mildenbergii*, characteristics of, 380
— *pseudomallei*, antigens of, 28
— *reptilivora*, antigens of, 28
— —, lecithinase production by, 939
— *tabaci*, characteristics of, 974
— *viscosa*, lecithinase production by, 939
Purines, antagonisms between, in auxotrophs of *Salmonella typhimurium*, 331
Pyrimidine catabolism in *Nocardia corallina*, 59
Pyruvate, formation of, from ribose, by *Microbacterium lacticum*, 246

Q Fever vaccine, production of, 794

Rabbit serum, brucellacidal activity of, 684
Rauwolfia alkaloids, microbial transformation of, 504
Resistance, drug, episome-mediated transfer of, in *Enterobacteriaceae*, 669, 679
— of *Escherichia coli* to anticancer agents, 419
Respiration, endogenous, ammonia production during, 721
Respiratory chain of streptomyces, 557
Reversion(s) of an *Escherichia coli* auxotroph, 786
— — L forms of *Proteus mirabilis*, 762
Rhamnose in capsular polysaccharide, 688, 694
Rhizopus, dissimilation of glucose by, 1
Ribonucleic acid, synthesis of, by *Bacillus megaterium*, 319
— — — —, — *Escherichia coli*, 918
Ribose, biosynthesis of, in *Escherichia coli*, 837
— 5-phosphate utilization in *Microbacterium lacticum*, 246
Ribulokinase in *Escherichia coli*, 998
Rickettsial growth in monolayer cell cultures, 741

Saccharomyces carlsbergensis:*Lactobacillus casei* interrelationships, 519
— —:— *plantarum* interrelationships, 519
— *cerevisiae*, ammonia production by, during endogenous respiration, 721
— —, cerium uptake by, 733
— —, nucleotide level in, effect of paludrine on, 831
Salmonella anatum, assimilation of amino acids by, 118, 126
— *derby*, assimilation of amino acids by, 118, 126
— *enteritidis*, drug resistance of, 669, 679
— — infection in mice, experimental, 863
— —, sucrose variant of, 1007
— *gallinarum*, assimilation of amino acids by, 118, 126
— *newport*, assimilation of amino acids by, 118, 126
— *oranienburg*, assimilation of amino acids by, 118, 126
— *paratyphi*, L forms of, 875
— *pullorum*, assimilation of amino acids by, 118, 126
— *schottmuelleri*, deoxyribokinase in, 328
— species, lysis of, by lysozyme, 482
— *typhimurium*, antagonisms between purines in auxotrophs in, 331
— —, assimilation of amino acids by, 118, 126
— —, drug resistance of, 669, 679
— *typhosa*, H antigen of, 924
— — Vi-phage types, curing of lysogenic, by ultraviolet irradiation, 474
— *worthington*, assimilation of amino acids by, 118, 126
Salmonellae, assimilation of amino acids by, 118, 126
Salmonellosis, experimental, in mice, 863
Sarcina lutea, cerium uptake by, 733
— *ventriculi*, electron microscopy of, 311
— —, production of cellulose by, 311
— —, role of cellulose in, 311
Schizosaccharomyces octosporus, cerium uptake by, 733
— *pombe*, cerium uptake by, 733
Serratia marcescens, cerium uptake by, 733
— —, lysis of, by lysozyme, 482
— —, pigmentation of, 376
Serum, rabbit, brucellacidal activity of, 684
Shigella flexneri, drug resistance of, 669, 679
Soil, distribution of streptomycetes in, 218
—, *Pseudomonas indigofera* in, 858
Sorbic acid, inhibition of alcoholic fermentation by, 189
— —, — — enolase by, 189
Spheroplasts of *Bacillus megaterium*, 160
Spirillaceae, lecithinase production by, 939
Spirillum atlanticum, electron microscopy of, 195
— *linum*, electron microscopy of, 195
— *lunatum*, electron microscopy of, 195
— *serpens* var. *azotum*, electron microscopy of, 195
— — — *serpens*, electron microscopy of, 195
— *sinuosum*, electron microscopy of, 195
— *volutans*, electron microscopy of, 195
Spore(s) as antigens, 622
—, *Aspergillus niger*, role of polyphosphate and phospholipid in germinating, 10
—, diphosphopyridine nucleotide oxidase in, 642
—, dipicolinic acid in, 642
— germination of *Bacillus megaterium*, 204
—, — —, with alkyl primary amines, 768
— of *Bacillus cereus*, electron transport systems in, 51
— — streptomyces, electron microscopy of spores of, 70
Sporotrichum schenckii, dimorphism of, 464
Sporulation of *Bacillus sphaericus*, 725
Staphylococcal L forms, cultivation of, 832
Staphylococci, medium for coagulase-positive, 636
—, phagocytosis of, by leukocytes in presence of botulinum toxin, 156
Staphylococcus aureus, formation of penicillinase in, 895
— —, medium for coagulase-positive, 636
—, kanamycin resistance in phage type of, 157
Steroids, antimicrobial properties of, 366
Streptococcus faecalis, ammonia production by, during endogenous respiration, 721
— —, cell wall synthesis in, 36
— —, lysis of, 36
— —, nutrition of, 36

Streptomyces algobriscolus, electron microscopy of spores of, 70
— *albus*, cerium uptake by, 733
— —, taxonomy of, 431
— *coelicolor*, respiration of, 557
— *diastaticus*, electron microscopy of spores of, 70
— *diastatochromogenes*, electron microscopy of spores of, 70
— *erythraeus*, electron microscopy of spores of, 70
— *flavovirens*, cerium uptake by, 733
— *fradiae*, respiration of, 557
— *griseus*, respiration of, 557
— —, taxonomy of, and *Streptomyces albus*, 431
— *lavendulae*, respiration of, 557
— *olivaceus*, electron microscopy of spores of, 70
— *purpurascens*, electron microscopy of spores of, 70
—, respiratory characteristics of, 557
— *rimosus*, respiration of, 557
— species, differentiation of, 70
— spores, electron microscopy of, 70
— *viridans*, cereum uptake by, 733
— *viridochromogenes*, electron microscopy of spores of, 70
— *viridoflavus*, cereum uptake by, 733
Streptomycetes that produce antibiotics, distribution of, 218
Streptomycin, use of, in experimental bacterial infections in mice, 233
Succinoxidase, effect of fractions of *Pseudomonas aeruginosa* on, 459
Sucrose, incorporation of, by *Torulopsis utilis*, 178
— oxidation in *Torulopsis utilis*, pathway of, 182
— variant of *Salmonella enteritidis*, 1007
Sulfate, accumulation of, in *Penicillium chrysogenum*, 91
— deficiency, macromolecule synthesis in *Mycobacterium bovis* induced by, 933
Sulfathiazole, drug resistance of *Enterobacteriaceae* to, 669, 679
Symbiotic bacteria of the cockroach, electron microscopy of, 267

Taxonomy of *Agarbacterium alginicum* and *Alginomonas alginica*, 162
— — nonpigmented mycobacteria, 338
— — *Pseudomonas mildenbergii*, 380
— — *Streptomyces albus*, 431
Temperature, effect of, on virulence of *Pasteurella pestis*, 649, 656
—, — —, — water requirements of bacteria, 353, 359, 401, 409
Tetracycline, drug resistance of *Enterobacteriaceae* to, 669, 679
—, use of, in experimental bacterial infections in mice, 233
Tetrahymena pyriformis, isocitritase in, 154
— —, malate synthetase in, 154
Therapy in experimental bacterial infections in mice, 233
Thermal inactivation of variola virus, 699
Thermophiles, heat output of, 165
Thiamine, effect of, on water requirements of *Lactobacillus viridescens*, 359
Thiolurocanic acid, formation of, by *Alcaligenes faecalis*, 715
Tissue culture, pleuropneumonia-like infections of, 626
—, monkey, maintenance of, 564
Tobacco, wildfire disease of, 974
Torulopsis utilis, effect of pH on utilization of acetate by, 178
— —, incorporation of acetate by, 178
— —, — — sucrose by, 178
— —, pathway of sucrose oxidation in, 182
Toxin production by *Corynebacterium diphtheriae*, 527
—, type E botulinum, purification and activation of, 819
Toxinogeny in *Corynebacterium diphtheriae*, 527
Transaldolase, in *Microbacterium lacticum*, 246
— in polysaccharide biosynthesis, 694
Transformation in *Bacillus subtilis*, 741, 823
Transketolase in *Microbacterium lacticum*, 246
— — polysaccharide biosynthesis, 694
Trichophyton mentagrophytes, antimicrobial properties of dimethoxy progesterone for, 366
— *rubrum*, arsine production by, 157
Tryptophan synthetase in *Escherichia coli*, 81
— — mutant of *Neurospora crassa*, 955, 964
Tubercle bacilli, intracellular growths of, 979
Tylosin, use of, in experimental bacterial infections in mice, 233

Ultraviolet irradiation, curing of lysogenic *Salmonella typhosa* Vi phage types by, 474
— light, recovery of *Escherichia coli* irradiated with, 288
— —, resistance of *Escherichia coli* to, 419
Uracil-thymine oxidase in *Nocardia corallina*, induction of, 59
Urea, formation of, from alloxanic acid, 755

Vaccine, Q fever, production of, 794
Vancomycin, use of, in experimental bacterial infections in mice, 233
Variant(s) of *Escherichia coli*, action of copper in recovery of, 448
— — *Pasteurella pestis*, detection of, 605
—, sucrose, of *Salmonella enteritidis*, 1007
Variola virus, thermal inactivation of, 699
Venezuelan equine encephalomyelitis virus, growth of, in L cells, 20
Vibrio comma, lecithinase production by, 939

— —, phage susceptibility of, 830
— *succinogenes* sp. n., characteristics of, 911
Vi-phage types of *Salmonella typhosa*, curing of, by ultraviolet irradiation, 474
Virulence assay of *Coccidioides immitis* in eggs, 226
— factors, synthesis of, in *Pasteurella pestis*, 656
— of *Pasteurella pestis*, 704
— — — —, effect of temperature on, 649, 656
Virus, foot and mouth disease, conglutinating adsorption test for, 478
—, type II polio, growth of, in monkey ileum, 564
—, variola, thermal inactivation of, 609
—, see Meningopneumonitis

Water requirements of bacteria, 353, 359, 401, 409
Wildfire disease of tobacco, 974
Wool, heat output of thermophiles on, 165

X-ray inactivation in *Nocardia corallina*, photoprotection against, 524

Yeast(s) growth, aminopterin inhibition of, 730
—:Lactobacillus interrelationships, 519
—, molybdate agar for differentiating, 869
—, sorbic acid inhibition of alcoholic fermentation in, 189
Yohimbine, hydroxylation of, by microorganisms, 504

Herald R. Cox, President (1960), Lederle Laboratories, Inc., Pearl River, New York.
John Blair, Vice President (1960), Hospital for Joint Diseases, New York, New York.
E. M. Foster, Secretary, University of Wisconsin, Madison, Wisconsin.
J. H. Bailey, Treasurer, Sterling-Winthrop Research Institute, Rensselaer, New York.

CONTENTS

No. 1, JANUARY 1961

Dissimilation of Glucose by the MX Strain of Rhizopus. Maurice Margulies and Wolf Vishniac 1–9
Role of Polyphosphate and Phospholipid in Germinating Spores of *Aspergillus niger*. Arasuke Nishi 10–19
Growth of Venezuelan Equine Encephalomyelitis Virus in L Cells. I. Growth in Monolayer Cultures. Frank M. Hardy and Arthur Brown 20–27
Identification of Pathogenic Pseudomonads by Extracellular Antigens. Pinghui V. Liu 28–35
Lysis of *Streptococcus faecalis*. Gerald D. Shockman, Margaret J. Conover, Joseph J. Kolb, Phoebe M. Phillips, Lillian S. Riley, and Gerrit Toennies 36–43
Nutritional Requirements for Bacterial Cell Wall Synthesis. Gerald D. Shockman, Margaret J. Conover, Joseph J. Kolb, Lillian S. Riley, and Gerrit Toennies 44–50
Comparison of Electron Transport Systems in Vegetative Cells and Spores of *Bacillus cereus*. Roy H. Doi and Harlyn Halvorson 51–58
Induction of Enzymes for Pyrimidine Catabolism in *Nocardia corallina*. Richard D. Batt 59–64
Factors Affecting the Accumulation of Biotin by *Lactobacillus arabinosus*. Herman C. Lichstein and James R. Waller 65–69
Electron Microscopy of Streptomyces Spore Morphology and Its Role in Species Differentiation. H. D. Tresner, M. C. Davies, and E. J. Backus 70–80
Influence of 3-Methylanthranilic and Anthranilic Acids on the Formation of Tryptophan Synthetase in *Escherichia coli*. Gabriel Lester and Charles Yanofsky 81–90
Accumulation of Intracellular Inorganic Sulfate by *Penicillium chrysogenum*. Irwin H. Segel and Marvin J. Johnson 91–98
Enrichment and Cultivation of *Beggiatoa alba*. Lois Faust and R. S. Wolfe 99–106
Anaerobic Dissimilation of Glucose-C^{14} by *Escherichia coli*. L. M. Paege and Martin Gibbs 107–110
Gene Unstabilization Induced by Heat and by Nitrous Acid. Stephen Zamenhof 111–117
Oxidative Assimilation of Amino Acids by Salmonellae in Relation to Growth Rate. J. L. Stokes and H. G. Bayne 118–125
Amino Acid Metabolism of Salmonellae. H. G. Bayne and J. L. Stokes 126–129
Cytophaga succinicans Sp. N., a Facultatively Anaerobic, Aquatic Myxobacterium. Richard L. Anderson and Erling J. Ordal 130–138
CO_2-Dependent Fermentation of Glucose by *Cytophaga succinicans*. Richard L. Anderson and Erling J. Ordal 139–146
Nutritional Studies on *Lactobacillus heterohiochi*. A. L. Demain, E. L. Rickes, D. Hendlin, and Evelyn C. Barnes 147–153
NOTES:
Malate Synthetase and Isocitritase in *Tetrahymena pyriformis*. Henry Reeves, Marco Papa, Gerald Seaman, and Sam Ajl 154–155
Preparation of Stable *Listeria monocytogenes* O Antigen. Miklós Füzi and Iván Pillis 155–156
Phagocytosis of Staphylococci by Mouse Leukocytes in the Presence of Botulinum Toxin. Noel L. Freeman 156–157
Arsine Production by *Trichophyton rubrum*. R. A. Zussman, E. E. Vicher, and I. Lyon 157
Appearance of Kanamycin Resistance in a Single Phage Type of Staphylococcus. Lewis J. Griffith, William E. Ostrander, Zane F. Smith, and Doris E. Beswick 157–159
Simple Teaching Method for Illustrating the Principles of Dark-Field Illumination. S. Faine 159–160

Autolytic Formation of Spheroplasts of *Bacillus megaterium* after Cessation of Aeration. Tomio Kawata, Kaizo Asaki, and Atsushi Takagi 160–161
Agarbacterium alginicum: The Appropriate Taxonomic Designation for *Alginomonas alginica*. J. N. Adams, Joy Williams, and W. J. Payne 162–163
Acetyl L-Isoleucine and Acetyl L-Leucine as Extracellular Products of *Mycobacterium range*. Audree V. Fowler, Merrill N. Camien, and Max S. Dunn 163–164

No. 2, February 1961

Heat Output of Thermophiles Occurring on Wool. H. P. Rothbaum 165–171
Heat Output of *Escherichia coli*. H. P. Rothbaum and H. M. Stone 172–177
Incorporation of Acetate and Sucrose by *Torulopsis utilis*. William T. Jackson and Marvin J. Johnson 178–181
Pathway of Sucrose Oxidation in *Torulopsis utilis*. William T. Jackson and Marvin J. Johnson 182–188
Inhibition of Alcoholic Fermentation by Sorbic Acid. J. J. Azukas, R. N. Costilow, and H. L. Sadoff 189–194
Electron Microscopy of Flagellation in Species of *Spirillum*. Marion A. Williams and George B. Chapman 195–203
Interaction of Heat, Glucose, L-Alanine, and Potassium Nitrate in Spore Germination of *Bacillus megaterium*. Mildred T. Hyatt and Hillel S. Levinson 204–211
Reversal of Azaserine by Phenylalanine. Thomas D. Brock and M. Louise Brock 212–217
Distribution of Streptomycetes that Produce Antibiotics. John B. Routien 218–225
Virulence Assay of *Coccidioides immitis* in Embryonated Eggs. William G. Roessler, John L. Converse, and John A. Geating 226–232
Guide to Antibiotic Therapy of Experimental Bacterial Infections in Mice. Warren E. Wick, Frank Streightoff, and Donald H. Holmes 233–235
Control by Endogenously Synthesized Arginine of the Formation of Ornithine Transcarbamylase in *Escherchia coli*. Richard P. Novick and Werner K. Maas 236–240
Coagulation of Human Plasma by *Pasteurella pestis*. Daniel M. Eisler 241–245
Pathway of Ribose 5-Phosphate Utilization in *Microbacterium lacticum*. M. I. Krichevsky and W. A. Wood 246–257
Filament Formation and Resistance to 1-Methyl-3-Nitro-1-Nitrosoguanidine and Other Radiomimetic Compounds in *Escherichia coli*. W. W. Kilgore and Joseph Greenberg 258–266
Electron Microscopy of Symbiotic Bacteria in Developing Oocytes of the American Cockroach, *Periplaneta americana*. Guy L. Bush and George B. Chapman 267–276
Identification of *Haemophilus vaginalis*. Charles D. Dukes and Herman L. Gardner 277–283
Oxidative Assimilation of Glucose and Endogenous Respiration of *Bacillus cereus*. C. E. Clifton and J. M. Sobek 284–287
Recovery of *Escherichia coli* Irradiated with Ultraviolet Light. Fumio Sawada and Kenshi Suzuki 288–297
Growth of Meningopneumonitis Virus in the Chick Embryo. K. O. Smith and G. P. Manire 298–302
Induction and Inhibition of α-Glucosidase Synthesis in *Candida stellatoidea*. S. G. Bradley and D. C. Creevy 303–310
Studies on *Sarcina ventriculi*. III. Localization of Cellulose. E. Canale-Parola, R. Borasky, and R. S. Wolfe 311–318
Increase in Ribonucleic Acid in the Bacterial Chromatin Body During Chloramphenicol Treatment. David H. Ezekiel 319–326
NOTES:
Mechanism of Growth Inhibition of *Escherichia coli* by 3-Amino-1,2,4-Triazole. T. J. Bond and Jerry Akers 327–328
Deoxyribokinase in *Salmonella schottmuelleri*. Charles G. Smith 328–329

No. 3, MARCH 1961

Antagonisms between Purines and Purine Analogues in Auxotrophs of *Salmonella typhimurium*. Gurudutt P. Kalle and Joseph S. Gots 331–337
Taxonomic Analysis of Nonpigmented, Rapidly Growing Mycobacteria. L. F. Bojalil and J. Cerbón 338–345
Escherichia coli A Antigen. K. Sahab 346–352
Moisture Requirements of Bacteria. II. Influence of Temperature, pH, and Malate Concentration on Requirements of *Aerobacter aerogenes*. R. J. Wodzinski and W. C. Frazier 353–358
Moisture Requirements of Bacteria. III. Influence of Temperature, pH, and Malate and Thiamine Concentration on Requirements of *Lactobacillus viridescens*. R. J. Wodzinski and W. C. Frazier 359–365
Steroids Clix. Antimicrobial Properties of 21,21-Dimethoxy Progesterone and Other Progesterone Analogues. C. Casas-Campillo, Dora Balandrano, and A. Galarza 366–375
Studies on Pigmentation of *Serratia marcescens*. V. Accumulation of Pigment Fractions with Respect to Length of Incubation Time. Robert P. Williams, Cora Lee Gott, and James A. Green 376–379
Catalase Activity of *Haemophilus* Species Grown with Graded Amounts of Hemin. Ernst L. Biberstein and Marjorie Gills 380–384
Correct Description of *Pseudomonas mildenbergii* Bergey et al., 1930. William C. Haynes 385–386
Diphtheria-Phage Inhibitor Produced by Treating the Host Bacterium with Oleic Acid. Neal B. Groman 387–393
Relation between Adsorption of Diphtheria Phage and Its Inactivation by an Oleic Acid-Activated Inhibitor. Neal B. Groman and Kaz McCormick 394–400
Moisture Requirements of Bacteria. IV. Influence of Temperature and Increased Partial Pressure of Carbon Dioxide on Requirements of Three Species of Bacteria. R. J. Wodzinski and W. C. Frazier 401–408
Moisture Requirements of Bacteria. V. Influence of Temperature and Decreased Partial Pressure of Oxygen on Requirements of Three Species of Bacteria. R. J. Wodzinski and W. C. Frazier 409–415
Catalase of *Pediococcus cerevisiae*. E. A. Delwiche 416–418
Resistance and Cross-Resistance of *Escherichia coli* Mutants to Anticancer Agents. 1-Methyl-3-Nitro-1-Nitrosoguanidine. Joseph D. Mandell, Pearl L. Woody, and Joseph Greenberg 419–424
Bacterial Oxidation of Benzene. Eleanor K. Marr and Robert W. Stone 425–430
Streptomyces albus (Rossi-Doria) Waksman et Henrici: Taxonomic Study of Strains Labeled *Streptomyces albus*. T. G. Pridham and A. J. Lyons, Jr. 431–441
Mycobacteriophage. I. Physicochemical Characterization. Margaret I. Sellers and H. Richard Runnals 442–447
Small Colony Variants of *Escherichia coli*. Mode of Action of Copper in Variant Recovery and Population Dynamics of Cultures Containing Variants. Herbert M. Hirsch 448–458
Effect of Microbial Fractions on the Metabolism of Liver and Monocytes from Mice. R. S. Berk and Eric L. Nelson 459–463
Dimorphism of *Sporotrichum schenckii*. Dexter H. Howard 464–469
Observations on the Behavior in Vitro of *Pasteurella tularensis* after Phagocytosis. David Stefanye, Hugh B. Tresselt, and Leonard Spero 470–473
Curing of Lysogenic *Salmonella typhosa* Vi-Phage Types by Ultraviolet Irradiation. K. S. Read and W. W. Ferguson 474–477
Conglutinating Complement Adsorption Test as Applied to Foot and Mouth Disease. N. L. Norcross and G. C. Poppensiek 478–481
Bacteriolysis of *Enterobacteriaceae*. I. Lysis by Four Lytic Systems Utilizing Lysozyme. Eric C. Noller and S. E. Hartsell 482–491
Bacteriolysis of *Enterobacteriaceae*. II. Pre- and Co-Lytic Treatments Potentiating the Action of Lysozyme. Eric C. Noller and S. E. Hartsell 492–499

NOTES:

Preparation of Pleuropneumonia-Like Organisms for Microscopic Study. Harold W. Clark, Richard C. Fowler, and Thomas McP. Brown 500–502

Relationships between Phage Susceptibility and Colonial Phenotype of *Brucella abortus*. Rosslyn W. I. Kessel and Werner Braun 503–504

Microbial Transformation of Rauwolfia Alkaloids. II. 10-Hydroxyyohimbine. Edward Meyers and Samuel C. Pan 504–505

Relation of Biotin to Inorganic Phosphate: Adenosine Triphosphate Exchange. Joanne M. Whitaker and Wayne W. Umbreit 505

No. 4, April 1961

Note to Contributors. J. R. Porter 507

Glyoxylic Acid Carboligase: An Enzyme Present in Glycolate-grown *Escherichia coli*. Gladys Krakow, S. S. Barkulis, and J. A. Hayashi 509–518

Lactobacillus: Yeast Interrelationships. Lawrence K. Nakamura and Paul A. Hartman 519–523

Photoprotection against X-Ray Inactivation in *Nocardia corallina*. J. B. Clark and Janice Frady 524–526

Toxinogeny in *Corynebacterium diphtheriae*. Lane Barksdale, Louis Garmise, and Rafael Rivera 527–540

Intermediary Metabolism of *Diplococcus glycinophilus*. I. Glycine Cleavage and One-Carbon Interconversions. Richard D. Sagers and I. C. Gunsalus 541–549

Pathogenicity of Candida. Sah'l Mourad and Lorraine Friedman 550–556

Respiratory Chain of Streptomyces. Donald J. Niederpruem and David P. Hackett 557–563

Maintenance of Intestinal Tissue in Vitro and the Multiplication of Poliovirus in Excised Segments of Monkey Intestinal Tract. Joel Warren and Eleanor R. Kaufman 564–567

Physiology of Nitrogen Fixation by a Species of *Achromobacter*. Royal D. Goerz and Robert M. Pengra 568–572

Production of a Permeability Defect in *Escherichia coli* by the Mutagenic Alkylating Agent, Ethyl Sulfate. Bernard S. Strauss 573–580

Biochemical and Serological Reactions of an Oral Filamentous Organism. Arthur V. Kroeger and Louis R. Sibal 581–585

Critical Factors Influencing Growth of L Forms of *Proteus mirabilis*. Robert A. Altenbern 586–594

Production of Heparinase by Bacteroides. Bertram M. Gesner and Charles R. Jenkin 595–604

Studies on the Nutrition and Physiology of *Pasteurella pestis*. VI. A. Differential Plating Medium for the Estimation of the Mutation Rate to Avirulence. Kiyoshi Higuchi and James L. Smith 605–608

Thermal Inactivation Studies with Variola Virus. Nicholas Hahon and Edmund Kozikowski 609–613

Degradation of Collagenous Substrates by *Bacteroides melaninogenicus*. Ronald J. Gibbons and John B.MacDonald 614–621

Antigenic Relationship of the Endospores of *Bacillus cereus*-like Insect Pathogens to *Bacillus cereus* and *Bacillus anthracis*. Carl Lamanna and Linda Jones 622–625

Pleuropneumonia-like (Mycoplasma) Infections of Tissue Culture. Theodore R. Carski and Charles C. Shepard 626–635

New Selective and Differential Medium for Coagulase-positive Staphylococci allowing Rapid Growth and Strain Differentiation. Sydney M. Finegold and Edward E. Sweeney 636–641

Mechanism of Dipicolinic Acid Stimulation of the Soluble Reduced Diphosphopyridine Nucleotide Oxidase of Spores. Roy H. Doi and Harlyn Halvorson 642–648

Effect of Temperature on Growth and Virulence of *Pasteurella pestis*. Physical and Nutritional Requirements for Restoration of Virulence. H. B. Naylor, G. M. Fukui, and C. R. McDuff 649–655

Synthesis of Virulence Factors by *Pasteurella pestis*. G. M. Fukui, W. D. Lawton, and R. P. Mortlock 656–660
An Anaerobic Oral Filamentous Microorganism. Else Theilade and Marion N. Gilmour 661–666
NOTE:
Direct Observation of Fusion of Bacterial Nuclei. M. Schaechter and V. O. Laing 667–668

No. 5, May 1961

Episome-Mediated Transfer of Drug Resistance in *Enterobacteriaceae*. I. Transfer of Resistance Factors by Conjugation. Tsutomu Watanabe and Toshio Fukasawa 669–678
Episome-Mediated Transfer of Drug Resistance in *Enterobacteriaceae*. II. Elimination of Resistance Factors with Acridine Dyes. Tsutomu Watanabe and Toshio Fukasawa 679–683
Microcolony Brucellacidal Test. R. J. Bienvenu, Jr., L. J. Rode, and V. T. Schuhardt 684–687
Pathways for Biosynthesis of a Bacterial Capsular Polysaccharide. I. Characterization of the Organism and Polysaccharide. W. Herman Taylor and Elliot Juni 688–693
Pathways for Biosynthesis of a Bacterial Capsular Polysaccharide. II. Carbohydrate Metabolism and Terminal Oxidation Mechanisms of a Capsule-Producing Coccus. W. Herman Taylor and Elliot Juni 694–703
New Antigenic Component of *Pasteurella pestis* Formed under Specified Conditions of pH and Temperature. Shlomo Ben-Efraim, Moshe Aronson, and Leah Bichowsky-Slomnicki 704–714
Degradation of Ergothioneine by Cell-Free Extracts of *Alcaligenes faecalis*. Beatrice Kelly and M. D. Appleman 715–720
Nitrogenous Compounds as Substrates for Endogenous Respiration in Microorganisms. Audrey F. Gronlund and J. J. R. Campbell 721–724
Sporulation of *Bacillus sphaericus* Grown in Association with *Erwinia atroseptica*. Robert J. Brady, Eddie C. S. Chan, and Michael J. Pelczar, Jr. 725–729
Aminopterin Inhibition of Yeast Growth; Relationship to Biotin and Aspartate. Joanne M. Whitaker and Wayne W. Umbreit 730–732
Fission-Product and Cerium Uptake by Bacteria, Yeasts, and Molds. G. T. Johnson and G. C. Kyker 733–740
Requirements for Transformation in *Bacillus subtilis*. C. Anagnostopoulos and John Spizizen 741–746
Influence of Various Metabolites on Growth of *Coxiella burnetii* in Monolayer Cultures of Chick Embryo Entodermal Cells. Virginia L. Blackford 747–754
Metabolism of Alloxanic Acid in a Soil Microorganism. Clarke T. Gray, Marcus S. Brooke, and John C. Gerhart 755–761
Reversion of 3A Type L Forms of *Proteus mirabilis*. Robert A. Altenbern 762–767
Germination of Bacterial Spores with Alkyl Primary Amines. L. J. Rode and J. W. Foster 768–779
Microcyst of *Myxococcus xanthus*. Chemical Composition of the Wall. J. C. Adye and D. M. Powelson 780–785
Spontaneous and Mutator-Induced Reversions of an *Escherichia coli* Auxotroph. I. Prototrophic Types and Their Growth Characteristics. Donald F. Bacon and Henry P. Treffers 786–793
Method for the Production of a Purified Dry Q Fever Vaccine. Sanford Berman, Raymond B. Gochenour, Gerald Cole, Joseph P. Lowenthal, and Abram S. Benenson 794–799
Properties of Gums Formed by *Alcaligenes faecalis*. Lyman A. Magee and Arthur R. Colmer 800–802
Growth Regulation in *Penicillium puberulum* by Estradiol-17β and Deoxycorticosterone. Gabriel Lester and Oscar Hechter 803–811

Factors Influencing the Growth of a Stable L Form of *Proteus mirabilis*. Claes Weibull and Britt-Marie Lundin 812–818
Purification and Activation of *Clostridium botulinum* Type E Toxin. Julia Gerwing, Claude E. Dolman, and David A. Arnott 819–822
Physiological and Genetic Factors Affecting Transformation of *Bacillus subtilis*. F. E. Young and John Spizizen 823–829
NOTES:
Phage Susceptibility of Vibrios Isolated in Thailand. S. Mukerjee and U. K. Guha Roy 830–831
Effect of Paludrine on Diphosphopyridine Nucleotide Level in *Saccharomyces cerevisiae*. C. V. Pichappa and E. R. B. Shanmugasundaram 831–832
Cultivation of Staphylococcal L Forms in a Liquid Medium. Judith Marston 832–833
Morphology of *Nitrosomonas europaea* and Classification of the Nitrifying Bacteria. M. S. Engel 833–834
Mutants of *Escherichia coli* Constitutive for Alkaline Phosphatase. Annamaria Torriani and Frank Rothman 835–836

No. 6, June 1961

Biosynthesis of Pentoses in *Escherichia coli*. Factors Involved in Selection of Biosynthetic Pathways. Zbygniew M. Szynkiewicz, Henry Z. Sable, and Edward M. Pflueger 837–844
Biosynthesis of Pentose in *Escherichia coli*. Synthesis of Deoxyribose in Cells Infected with Bacteriophage. Elmer M. Wright, Henry Z. Sable, and Joy L. Bailey 845–851
Control of Ethanol Dehydrogenase Levels in *Aerobacter aerogenes*. Peter McPhedran, Barbara Sommer, and Edmund C. C. Lin 852–857
Pseudomonas indigofera. Bruce A. McFadden and William V. Howes 858–862
Experimental Salmonellosis. Intracellular Growth of *Salmonella enteritidis* Ingested in Mononuclear Phagocytes of Mice, and Cellular Basis of Immunity. Susumu Mitsuhashi, Ichiei Sato, and Tokumitsu Tanaka 863–868
Evaluation of Molybdate Agar as a Selective Differential Medium for Yeasts. Marilyn L. Holland and Lawrence J. Kunz 869–874
Genetic Nature of Stable L Forms of *Salmonella paratyphi*. Otto E. Landman and Herbert S. Ginoza 875–886
Secondary Colony Formation by *Bacillus subtilis* on Eosine Methylene Blue Arag. K. K. Shah and V. N. Iyer 887–894
Factors Modifying Induced Formation of Penicillinase in *Staphylococcus aureus*. Harry G. Steinman 895–902
Characteristics of Cellobiose Phosphorylase. James K. Alexander 903–910
Cytochrome-producing Anaerobic Vibrio, *Vibrio succinogenes*, Sp. N. M. J. Wolin, E. A. Wolin, and N. J. Jacobs 911–917
Effect of Dihydrostreptomycin on *Escherichia coli*. Norman R. Eaton and Ruth Caffrey 918–923
H Antigen of *Salmonella typhosa*. Joseph G. Tully and Sidney Gaines 924–932
Macromolecule Synthesis in Long Forms of *Mycobacterium bovis* Induced by Sulfate Deficiency. John K. Spitznagel 933–938
Lecithinase Production by Gram-Negative Bacteria. Marie T. Esselmann and Pinghui V. Liu 939–945
Cysts of Azotobacter. M. D. Socolofsky and Orville Wyss 946–954
Biochemical, Immunological, and Genetic Studies with a New Type of Tryptophan Synthetase Mutant of *Neurospora crassa*. Martin Rachmeler and Charles Yanofsky 955–963
Some Aspects of Tryptophan Synthetase Formation in *Neurospora crassa*. Gabriel Lester 964–973
Wildfire Disease of Tobacco. E. D. Garber 974–978
Intracellular Growth of Tubercle Bacilli and Other Mycobacteria in the J-111

Cell Line of Leukemic Monocytes. Edwin A. Brosbe, Paul T. Sugihara, and C. Richard Smith 979–985
Formation of Bacitracin by Protoplasts of *Bacillus licheniformis*. John E. Snoke 986–989
Detection of Brucellae and Their Antibodies by Fluorescent Antibody and Agglutination Tests. Max D. Moody, Joseph Z. Biegeleisen, Jr., and Gerald C. Taylor 990–995
Enzymatic Characterization of 17 L-Arabinose Negative Mutants of *Escherichia coli*. Ellis Englesberg 996–1006
NOTES:
Biochemical Variant of *Salmonella enteritidis* Which Utilizes Sucrose. Yoshikazu Watanabe, Charles M. Wilson, and Leonard Wampole 1007
Rapid Method for the Differentiation of Parasitic and Saprophytic Leptospirae. Miklós Füzi and Rózsa Csóka 1008
Selective Medium for Leuconostoc Detection. Jerry V. Mayeux and Arthur R. Colmer 1009–1011
Index of Authors 1013–1015
Index of Date of Issue 1015
Index of Subjects 1016–1024

INDEX OF SUBJECTS

Acetate formation in *Clostridium acidi-urici*, 233
Acetate-replacing factors for *Lactobacillus delbrueckii*, 657
Acetoin formation, 954
Acetokinase, formation in *Clostridium acidi-urici*, 233
Acetylornithinase, activity of, in *Escherichia coli*, 48
Achromobacter parvulus, taxonomy of, 1
Achromobacter-Pseudomonas group, taxonomy of, 1
Acid(s), *see* Acrylic, Amino, Anthranilic, Citric, Deoxyribonucleic, Fatty, Glutamic, Itaconic, Mesaconic, Nicotinic, Nucleic, Phthalic, Sialic, Uronic
Acrylic acid, antibiotic properties of, 72
Actinomyces, antigenic and serological relationships, 632
Actinomyces, serology of, 54
Actinomyces bovis, serology of, 54
Actinomycetes, formation of nitrate and nitrite, 442
Actinomycin peptide formation by *Streptomyces chrysomallus*, 600
Aerobacter aerogenes, anaerobic growth, effect of L-cystine on initiation of, 305
Aerobacter aerogenes, taxonomy of, 1
Aerobacter cloacae, action of penicillin on, 411
Aeromonas formicans, taxonomy of, 1
Aeromonas punctata, taxonomy of, 1
Agglutinin-adsorption analysis, *Vibrio fetus*, 210
Agglutinogen of *Bordetella pertussis*, 648
L-Alanine dehydrogenase, effect on spore germination, 706
Alcaligenes faecalis, taxonomy of, 1
Aldolase in *Mycobacterium tuberculosis*, 94
Algae, nystatin inhibition of, 247
Amino acid(s), halogenated, 640
Amino acid(s), induced spore germination, 706
Amino acid(s), interactions in *Neurospora crassa*, 20
Amino acid(s), metabolism in mycoplasma-infected animal cells, 288
Amino acid(s), unsaturated, microbiological properties, 640
p-Aminosalicylic acid, effect on protocatechuic acid, 361
Ammonium ion, effect on *Micrococcus sodonensis*, 823
α-Amylase, synthesis, in *Pseudomonas saccharophila*, 798
Anaerobic growth, *Aerobacter aerogenes*, effect of L-cystine on, 305
Anaerobic growth, *Escherichia coli*, effect of L-cystine on, 305
Anaerobic growth of *Mucor rouxii*, 142
Anthranilic acid, growth-inhibition of *Neurospora crassa* by, 20
Antibiotic properties of acrylic acid, 72
Antibodies to streptococcal cell walls, 736
Antibody, effect of body temperature on production of, 156
Antibody, against *Staphylococcus aureus*, in nonimmunized rabbits, 110
Antibody, preparation in *Histoplasma capsulatum*, 729
Antigen, pullorum, 150
Antigenic properties of pleuropneumonia-like organisms, 542
Antigenic relationship between *Hafnia* and *Shigella flexneri*, 313
Antigenic studies of *Candida*, 570, 574, 578
Apyocyanogenic strains of *Pseudomonas aeruginosa*, 787
Arthrobacter ureafaciens, morphogenesis, influence of cell extract on, 882
Aspartase, effect of avidin on, 383
Aspartase, effect of metal ions on, 383
Aspartase, inhibition by *p*-chloromercuribenzoate, 383
Aspartase, production by *Escherichia coli*, 383
Aspergillus niger, formation of citric acid by, 538
Assay of bacterial poly-β-hydroxybutyric acid, 33, 37
Assimilatory sulfate reduction, 933
Automatic inoculation of bacterial cultures, 995
Auxotroph of *Escherichia coli*, acetylornithinase activity of, 48
Azobacter agilis, function of molybdate in, effect of tungstate on, 130
Azotobacter agilis, polyol dehydrogenases, 224
Azotobacter vinelandii, *see Azotobacter agilis*

Bacilli, growth, large cell stage, 418
Bacillus cereus, distribution of mineral matter in, 556
Bacillus cereus, endogenous respiration of, 252
Bacillus cereus, growth, 418
Bacillus cereus, spore germination in, 706
Bacillus megaterium, production of poly-β-hydroxybutyric acid by, 33, 37
Bacillus megaterium, sporulation in, relationship to poly-β-hydroxybutyric acid, 37
Bacillus polymyxa, growth, 418
Bacillus subtilis, bacteriophages for, 135
Bacillus subtilis, endospores, effect of mechanical factors on, 691

Bacillus subtilis, endospores, germination, effect of metabolic inhibitors on, 793
Bacillus subtilis, spore germination, 691, 695
Bacterial dissimilation of streptomycin, 505
Bacteriophages for *Bacillus subtilis*, 135
Bacteriophages, types of *Staphylococcus aureus*, 124
Benzazoles, effect of, on colony variants of *Candida albicans*, 101
Body temperature, effect of, on antibody production in animals, 156
Bordetella pertussis, agglutinogen of, 648
Botulinum type E toxin, immunity to, 66
Brevibacterium linens, taxonomy of, color reactions, 241
Brucella, identification of, by oxidative rates, 387, 396, 401
Brucella, metabolic characterization of, 387, 396, 401, 950
Brucella abortus, oxidative metabolic patterns, 950
Brucella abortus, phage differentiation of, 319
Brucella abortus, susceptibility to *Brucella* bacteriophage, 950
Brucella melitensis, lysis, of, 342
Brucella melitensis, phage differentiation of, 319
Brucella melitensis, susceptibility to *Brucella* bacteriophage, 950
Brucella neotomae, susceptibility to *Brucella* bacteriophage, 950
Brucella suis, phage differentiation of, 319
Brucella suis, susceptibility to *Brucella* bacteriophage, 950

Candida albicans, antigenic groups in, 570
Candida albicans, pathogenicity of, 578
Candida albicans, response to glucosamine, 994
Candida albicans, small colony variants of, 101
Candida pseudotropicalis, utilization of nicotinic acid, 616
Candida stellatoidea, antigenic relationships, 574, 578
Candida stellatoidea, pathogenicity of, 578
Candida tropicalis, antigenic relationships, 574, 578
Candida utilis, spheroplasts of, 808
Canine distemper virus, immunity, 702
Carbon dioxide requirements of *Streptococcus bovis*, 85
Cell multiplication, study of with electronic particle counter, 857
Cephalosporium longisporum, manometric study of, 785
Chlortetracycline, resistance of *Staphylococcus aureus* to, 875
Citric acid, fermentation of sugars, 538
Citric acid, formation by *Aspergillus niger*, 538
Citritase, role in acetoin formation, 954
Citrulline ureidase activity and virulence of *Pasteurella tularensis*, 26
Claviceps purpurea, decarboxylation of L-glutamic acid, 354
Clostridium acidi-urici, acetate formation, acetokinase, 233
Clostridium botulinum type E toxin, immunity to, 66
Clostridium histolyticum, enzyme elaboration by, 582
Clostridium histolyticum, purification of proteinases by, 589
Clostridium nigrificans, hydrogenase activity of, 927
Clostridium perfringens, carbon-labeled toxin, 275
Coccidioides immitis, polysaccharide of, 714
Colony, small, variants of *Candida albicans*, 101
Complement-fixation test, experimental clinical melioidosis, 159
Complement-fixation test, *Pseudomonas pseudomallei*, 159
Corynebacterium poinsettiae, taxonomy of, 1
Corynebacterium vesiculare, motility and flagellation of, 154
Coxiella burnetii, synthesis of serine by, 761
Cryptococcus neoformans, growth, effect of human serum on, 430
Cryptococcus neoformans, growth, effect of pH of media on, 430
Cryptococcus neoformans, growth, effect of temperature on, 430
Culture methods for hospital floors, 619
Cystine and anaerobic growth of *Aerobacter aerogenes*, 305
Cystine and anaerobic growth of *Escherichia coli*, 305

Debaryomyces phaffii sp. n., isolation of, 326
Dehydrogenation of glucose by bacteria, 609
Demethylchlortetracycline, synthesis by *Streptomyces aureofaciens*, 615
Deoxyribonucleic acid, biosynthesis in *Escherichia coli*, 867
Deoxyribonucleic acid, isolation from *Staphylococcus aureus*, 425
Deoxyribonucleic acid, products, effect on deoxyribonucleic acid synthesis of pneumococci, 169
Deoxyribonucleic acid, products, effect on respiration of pneumococci, 181
Dextran formation by *Streptococcus bovis*, 85
Diplococcus, antigenic and serological relationships, 632
Dissimilation, bacterial, of L-fucose, 548
Dissimilation, bacterial, of L-rhamnose, 548
Dissimilation, bacterial, of streptomycin, 505
Dissimilatory sulfate reduction, 933

Divalent ions, requirements of *Treponema pallidum*, 909
Drug resistance, episome-mediated transfer of, in *Enterobacteriaceae*, 202

Electronic computer, use in taxonomic analysis, 913
Electronic particle counter, use to study cell multiplication, 857
Endospore germination, in *Bacillus subtilis*, 793
Endospores of *Bacillus subtilis*, 691
Enterobacteriaceae, antigenic relationships, 313
Enterobacteriaceae, episome-mediated transfer of drug resistance in, 202
Enzyme(s), activity of, in *Escherichia coli*, 48
Enzyme(s), in mycobacteria, 94
Enzyme(s), of *Piricularia oryzae*, 617
Enzyme(s), *see also* Acetokinase, Acetylornithinase, L-Alanine dehydrogenase, Aldolase, α-Amylase, Aspartase, Citritase, Hydrogenase, Penicillinase, Phosphatase, Phosphoglucomutase, Phosphohexoisomerase, Phosphohexokinase, Proteinase
Episome-mediated transfer of drug resistance in *Enterobacteriaceae*, 202
Equine encephalomyelitis virus, Venezuelan, growth of, in L cells, 449
Erysipelothrix rhusiopathiae, fermentation reactions of, 595
Escherichia coli, anaerobic growth, effect of L-cystine on initiation of, 305
Escherichia coli, biosynthesis of deoxyribonucleic acid in, 867
Escherichia coli, galactose metabolism in, 471
Escherichia coli, mutants of, 471
Escherichia coli, nutrient concentration and total growth of, 80
Escherichia coli, production of aspartase, 383
Escherichia coli, sialic acids in, 838, 849
Escherichia coli, susceptibility to lethal action of normal serum, 257
Escherichia coli, taxonomy of, 1
Escherichia coli, thymineless death, relationship to ultraviolet inactivation, 187
Escherichia coli, uptake of typhoid endotoxin, 257
Escherichia coli auxotroph, acetylornithinase activity of, 48

Fatty acids, oxidation, 492
Fatty acids, oxidation, in *Serratia marcescens*, 370
Fermentation, by *Erysipelothrix rhusiopathiae*, 595
Fermentation of glucose, 685
Flagellation of *Corynebacterium vesiculare*, 154
Flavobacterium aquatile, taxonomy of, 1
Fluorescein amine media for differentiation of staphylococci, 106
Fluorescein isothiocyanate, use in labeling, 534
Fluorescent antibody preparation, 729
Fluorescent antibody technique, use of in serology of actinomyces, 54
L-Fucose, bacterial dissimilation of, 548

Galactose metabolism, in *Escherichia coli*, 471
Genetic modifiers of streptomycin resistance, 461
Glucosamine, response of *Candida albicans* to, 994
Glucose, lactic fermentation of, 685
Glucose dehydrogenation by bacteria, 609
Glucose dissimilation, by yeast, 764
Glucose uptake, by bacterial spores, 743
Glucose uptake, by yeast, 764
L-Glutamic acid, decarboxylation by *Clariceps purpurea*, 354
Glutamic decarboxylase of *Clariceps purpurea*, 354
Glycine and monocyte-extract action on brucellae, 342
Glycolytic enzymes in *Mycobacterium tuberculosis*, 94
Guinea pigs, germ-free, experimental *Shigella* infections of, 284
Growth factors for *Mucor rouxii*, 142
Growth of microbial population, nutrients and, 80
Guinea pigs, immunity of, to botulinum type E toxin, 66

Hafnia and *Shigella flexneri*, antigenic relationship, 313
Halogenated amino acids, microbiological properties, 640
Hansenula, phosphomannan production, 265, 269
Hansenula wickerhamii sp. n., isolation of, 359
Heat, of glucose fermentation, 685
HeLa cells, inclusion bodies of Newcastle disease virus in, 151
Hemagglutinin, influenza virus, in mice, 458
Herpes simplex virus, in infected tissue cultures, 498
Heterogenetic bacterial antigen, 784
Histoplasma capsulatum, antibody preparation, 729
Histoplasma capsulatum, vaccines against, use of in experimental tuberculosis, 115
Hydrogenase, of *Clostridium nigrificans*, 927
3-Hydroxykynurenine, growth-inhibition of *Neurospora crassa* by, 20
Immunity to type E toxin of *Clostridium botulinum*, 66

Immunochemistry of pneumococcal types, 920
Inclusion bodies from Newcastle disease virus in HeLa cells, 151
Indole, growth inhibition of *Neurospora crassa* by, 20
Indole synthesis, control of in *Neurospora crassa*, 215
Indole test, 618
Influenza virus hemagglutinin, in mice, 458
Inoculation, automatic, of bacterial cultures, 995
Itaconic acid, metabolism, in *Pseudomonas* spp., 905
Itaconic acid, metabolism, in *Salmonella* spp., 905
Isoleucine, effect on peptide formation, 609
Itaconic acid, conversion to succinate, 376

K antigen and sialic acids, 849
Kynurenine, growth-inhibition of *Neurospora crassa* by, 20

L cells, growth of Venezuelan equine encephalomyelitis virus in, 449
Labeling, use of fluorescein isothiocyanate in, 534
Lactic fermentation of glucose, 685
Lactobacillus acidophilus, 623
Lactobacillus casei, taxonomy of, 1
Lactobacillus delbrueckii, acetate-replacing factors in, 657
Leuconostoc citrovorum, acetoin formation by, 954
Limiting nutrient, specific effect, 511
Lipids, in pleuropneumonia-like organisms, 479
Lipids, nonsaponifiable, 479
Listeria monocytogenes, growth, 528
Lysis of brucellae by glycine-monocyte extract, 342
Lysogeny in staphylococci, 984

Manometric studies of *Cephalosporium longisporum*, 785
Marine alga, *Phaeocystis pouchetii*, acrylic acid in, 72
Measles virus, relation to immunity in canine distemper virus, 702
Medium, fluorescein amine, for differentiation of staphylococci, 106
Melioidosis, experimental clinical, complement-fixation test in, 159
Menadione, as acetate-replacing agent, 657
Mesaconic acid, conversion to succinate, 376
Mesophilic bacteria, oxidative activity, 492
Metabolic inhibitors, effect on *Bacillus subtilis*, 793
Metadihydroxyphenols, oxidation by enzymes of *Piricularia oryzae*, 617
Mice, antibody production in, 156
Mice, immunity of, to botulinum type E toxin, 66
Mice, isolation of *Salmonella typhimurium* from, 153
Mice, pathogenicity of *Pseudomonas aeruginosa* for, 149
Mice, susceptibility of, to variola virus, 15
Micrococcus luteus, taxonomy of, 1
Micrococcus sodonensis, effect of ammonium ion on, 823
Micrococcus sodonensis, elaboration of extracellular material by, 828
Micrococcus sodonensis, metabolism, role of potassium in, 551
Molybdate, function of in *Azotobacter agilis*, effect of tungstate on, 130
Morphology of frozen yeast cells, 662
Morphology of *Mycobacterium fortuitum*, 517
Morphology of *Mycobacterium kansasii*, 517
Morphology of the Reiter treponeme, 967
Motility of *Corynebacterium vesiculare*, 154
Mucor rouxii, growth factors for, 142
Mucor rouxii, nutrition of, 142
Muller phenomenon, 770
Mutagenesis, chemical, mechanism, reaction of triethylene melamine and nucleic acid, 195
Mutants, of *Escherichia coli*, 471
Mutants, streptomycin-resistant, 461
Mycobacteria, biological and chemical studies, 517
Mycobacterium, antigenic and serological relationships, 632
Mycobacterium, antigenic and serological relationships, 632
Mycobacterium fortuitum, morphology, 517
Mycobacterium kansasii, morphology, 517
Mycobacterium tuberculosis, enzymes in, 94
Mycobacterium tuberculosis, glycolytic enzymes in, 94
Mycoplasma inoculum sp. n., 239
Mycoplasma-infected cells, metabolism, 288

Neurospora crassa, amino acid interactions in, 20
Neurospora crassa, effect of polyene antibiotics on, 889
Neurospora crassa, enzyme formation in, 898
Neurospora crassa, indole synthesis, control, 215
Newcastle disease virus, 979
Newcastle disease virus, inclusion bodies of, in HeLa cells, 151
Nicotinic acid, anaerobic growth factor for *Mucor rouxii*, 142
Nicotinic acid, utilization by *Candida pseudotropicalis*, 616
Nitrate, formation by actinomycetes, 442

Nitrate, formation by fungi, 442
Nitrate reductase, induction and repression in *Neurospora crassa*, 808
Nitrogen fixation, effect of molybdate on, 130
Nitrogen fixation, effect of tungstate on, 130
Nonsaponifiable lipids, 479
Novobiocin, resistance of *Staphylococcus aureus* to, 875
Nucleic acid, mechanism of chemical mutagenesis, reaction with triethylene melamine, 195
Nutrients and growth of microbial population, 80
Nutrition of *Listeria monocytogenes*, 528
Nutrition of *Pasteurella tularensis*, 564
Nutrition of *Streptococcus bovis* and dextran formation, 85
Nystatin inhibition of algae, 247

Ortho-phthalic acid, isolation from spores, 791
Oxidation, of fatty acids, 492

Pachysolen, phosphomannan production, 265
Pasteurella tularensis, nutrition, 564
Pasteurella tularensis, virulence and citrulline ureidase activity of, 26
Pathogenicity of *Candida*, 578
Pathogenicity of *Pseudomonas aeruginosa* for mice, 149
Penicillin, action on *Aerobacter cloacae*, 411
Penicillinase, staphylococcal, control of activity, 208
Penicillinase, staphylococcal, preparation, 620
Penicillinase in *Aerobacter cloacae*, action of penicillin on, 411
Peptide formation by *Streptomyces chrysomallus*, 600
Perfringens toxin, 275
Pesticin-bacterium interrelationships, 940
Pesticins, 940
Phaeocystis pouchetii, acrylic acid in, 72
Phage, *see* Bacteriophage
Phosphatase, acid, in *Staphylococcus aureus*, 124
Phosphoglucomutase in *Mycobacterium tuberculosis*, 94
Phosphohexoisomerase in *Mycobacterium tuberculosis*, 94
Phosphohexokinase in *Mycobacterium tuberculosis*, 94
Phosphomannan-producing yeasts, genera, 265
Phosphomannan-producing yeasts, phylogeny, 265, 269
Photobacterium fischeri, taxonomy of, 1
Photobacterium phosphoreum, taxonomy of, 1
Photo-oxidative killing of *Rhodopseudomonas spheroides* mutants, 314
Phthiocol, as acetate-replacing agent, 657
Pichia, phosphomannan production, 265
Piricularia oryzae, enzymes of, 617
Plasminogen-plasmin system, relationship to staphylococcal Muller phenomenon, 770
Pleuropneumonia-like organisms, antigenic properties, 542
Pleuropneumonia-like organisms, effect on metabolism of tissue cultures, 288
Pleuropneumonia like organisms, lipids of, 479
Pneumococcal types, immunochemistry, 920
Pneumococci, deoxyribonucleic acid synthesis, response to deoxyribonucleic acid products, 169
Pneumococci, respiration, effect of deoxyribonucleic acid products on, 181
Pneumococcus, streptomycin resistance in, 461
Poliovirus antigen, concentration and purification, 789
Poly-β-hydroxybutyric acid, production of, by *Bacillus megaterium*, 33, 37
Poly-β-hydroxybutyric acid, relationship of, to sporulation in *Bacillus megaterium*, 37
Polyene antibiotics, effect on *Neurospora crassa*, 889
Polymer systems, bacterial spores in, 331
Polyol dehydrogenases, formation by *Azotobacter agilis*, 224
Polysaccharide of *Coccidioides immitis*, 714
Polysaccharides, bacterial synthesis of, 436
Polysaccharides, uronic acid-containing, 436
Potassium, effect on *Micrococcus sodonensis*, 551
Proteinases, elaboration by *Clostridium histolyticum*, 582
Proteinases, purification, 589
Proteus, production of nonswarming colonies by, 621
Proteus vulgaris, taxonomy of, 1
Protocatechuic acid, effect of *p*-aminosalicylic acid on, 361
Pseudomonas, itaconic acid metabolism in, 905
Pseudomonas, taxonomy, analysis with electronic computer, 913
Pseudomonas-Achromobacter group, taxonomy of, 1
Pseudomonas aeruginosa, identification of apyocyanogenic strains, 787
Pseudomonas aeruginosa, pathogenicity of for mice, 149
Pseudomonas aeruginosa, taxonomy of, 1
Pseudomonas denitrificans, taxonomy of, 1
Pseudomonas elongata, taxonomy of, 1
Pseudomonas fluorescens, taxonomy of, 1
Pseudomonas fragi, taxonomy of, 1
Pseudomonas ovalis, taxonomy of, 1
Pseudomonas paronacea, taxonomy of, 1
Pseudomonas pseudomallei, complement-fixation test for, 159

Pseudomonas saccharophila, synthesis of α-amylase in, 798
Psychrophilic bacteria, oxidative activity, 492
Pullorum antigen composite, 150
Purine fermentation by *Clostridium acidi-urici*, 233
Pyrimidine utilization, by *Thermobacterium acidophilum* (*Lactobacillus acidophilus*), 623

Rabbit, antibody production in, 156
Rabbits, immunity of, to botulinum type E toxin, 66
Rabbits, nonimmunized, antibody in, against *Staphylococcus aureus*, 110
Reiter treponeme, influence of osmotic pressure on, 967
Reiter treponeme, morphology, 967
Resistance to tuberculosis, use of yeast vaccines to increase, 115
Respiration, endogenous, of *Bacillus cereus*, 252
L-Rhamnose, bacterial dissimilation of, 548
Rhodopseudomonas spheroides, mutants, photo-oxidative killing, 314
Ribosome particles, occurrence during spore germination, 695

Salmonella, itaconic acid metabolism in, 905
Salmonella typhimurium, isolation of, from laboratory mice, 153
Serine, synthesis by *Coxiella burnetii*, 761
Serology of actinomyces, 54
Serology of *Vibrio fetus*, agglutinin-adsorption analysis, 210
Serratia marcescens, fatty acid oxidation in, 370
Serum, human, effect on growth of *Cryptococcus neoformans*, 430
Shigellae, growth in monolayer tissue cultures, 815
Shigella dysenteriae, susceptibility to lethal action of normal serum, 257
Shigella dysenteriae, uptake of typhoid endotoxin, 257
Shigella flexneri and *Hafnia*, antigenic relationship, 313
Shigella flexneri, experimental infection of germ-free guinea pigs, 284
Shigella in germ-free guinea pigs, 284
Sialic acids and K antigen, 849
Sialic acids in *Escherichia coli*, 838, 849
Spheroplasts of *Candida utilis*, 808
Spodography, use to determine mineral matter in *Bacillus cereus*, 556
Spore(s), bacterial, in polymer systems, 331
Spore(s), chemical composition, 960
Spore(s), heat resistance, 960
Spore(s), isolation of *ortho*-phthalic acid from, 791
Spore(s), permeability, 743, 750
Spore germination, effect of L-alanine dehydrogenase on, 706
Spore germination in *Bacillus subtilis*, 691, 695
Sporulation in *Bacillus megaterium*, relationship to poly-β-hydroxybutyric acid, 37
Staphylococcal Muller phenomenon, 770
Staphylococcal penicillinase, control of activity, 298
Staphylococcal penicillinase, preparation, 620
Staphylococci, changes in phage typing patterns, 984
Staphylococci, differentiation of on fluorescein amine media, 106
Staphylococcus aureus, acid phosphatase in, 124
Staphylococcus aureus, antibiotic-sensitive recipient strains, 875
Staphylococcus aureus, antibody against, in non-immunized rabbits, 110
Staphylococcus aureus, coagulase production and acid phosphatase production, 124
Staphylococcus aureus cultures, appearance of sectored colonies, 316
Staphylococcus aureus, differentiation of on fluorescein amine media, 106
Staphylococcus aureus, isolation of deoxyribonucleic acid from, 425
Staphylococcus aureus, lysogenization, 984
Staphylococcus aureus, penicillin-resistant, control of activity, 298
Staphylococcus aureus, phage types of, 124
Staphylococcus epidermidis, differentiation of on fluorescein amine media, 106
Streptococcal cell walls, 736
Streptococcus, antigenic and serological relationships, 632
Streptococcus bovis, nutrition of, and dextran formation, 85
Streptococcus bovis, sulfur utilization by, 724
Streptococcus diacetilactis, acetoin formation by, 954
Streptomyces aureofaciens, synthesis of demethylchlortetracycline, 615
Streptomyces chrysomallus, actinomycin peptide formation by, 600
Streptomycin, bacterial dissimilation of, 505
Streptomycin resistance in pneumococci, 461
Succinate, derivation, from itaconic acid, 376
Succinate, derivation, from mesaconic acid, 376
Sulfadiazine, effect on synthesis of demethylchlortetracycline by *Streptomyces aureofaciens*, 615
Sulfate reduction, enzymatic basis for, 933
Sulfur utilization by *Streptococcus bovis*, 724
Surface-active substances, production by *Thiobacillus thiooxidans*, 788

Taxonomic relationships of phosphomannan-producing yeasts, 269

Taxonomy of *Brevibacterium linens*, color reactions, 241
Taxonomy of *Pseudomonas-Achromobacter* group, 1
Temperature, body, effect of on antibody production in animals, 156
Temperature, subzero, effect on yeast cells, 662, 673
Thermobacterium acidophilus (*Lactobacillus acidophilus*), 623
Thermophilic bacteria, 927
Thiamine, anaerobic growth factor for *Mucor rouxii*, 142
Thiobacillus thiooxidans, production of surface-active substances, 788
Thymine, absence in *Escherichia coli*, relationship to ultraviolet inactivation, 187
Tissue cultures, growth of shigellae in, 815
Tissue culture, infected, herpes simplex virus in, 498
Toxin, botulinum type E, immunity to, 66
Toxin, carbon-labeled, in *Clostridium perfringens*, 275
Toxin, vibrio El Tor, hemolytic properties of, 43
Toxin, vibrio El Tor, lethal properties of, 43
Toxin, vibrio El Tor, production of, in liquid medium, 43
Toxoid, botulinum type E, immunity to, 66
Toxoplasma gondii, laboratory maintenance, 315
Transduction of drug resistant factors in *Enterobacteriaceae*, 202
Treponema pallidum, ionic requirements of, 909
Triethylene melamine, mechanism of chemical mutagenesis, reaction with nucleic acid, 195
Tryptophan, growth inhibition of *Neurospora crassa* by, 29
Tuberculosis, experimental, use of yeast vaccines in, 115
Tungstate, effect of, on function of molybdate in *Azotobacter agilis*, 130

Ultraviolet, effect of, on colony variants of *Candida albicans*, 101
Ultraviolet inactivation, relationship to thymineless death in *Escherichia coli*, 187
Uronic acid-containing polysaccharides, 436

Vaccines, yeast, use of, in experimental tuberculosis, 115
Valine, effect on peptide formation, 669
Variables in spore permeability, 750
Variants, small colony, of *Candida albicans*, 101
Variola virus neutralization test in mice, 15
Variola virus, susceptibility of mice to, 15
Venezuelan equine encephalomyelitis virus, growth of, in L cells, 449
Vibrio cuneatus, taxonomy of, 1
Vibrio El Tor toxin, production of, in liquid medium, 43
Vibrio fetus, agglutinin-adsorption analysis, 210
Vibrio metschnikovii, taxonomy of, 1
Vibrio tyrogenus, taxonomy of, 1
Virulence and citrulline ureidase activity of *Pasteurella tularensis*, 26
Virus, Newcastle disease, inclusion bodies of, in HeLa cells, 151
Virus, variola, susceptibility of mice to, 15
Vitamin requirements for *Mucor rouxii*, 142

Xanthomonas spp., taxonomy, analysis with electronic computer, 913

Yeast(s), isolation of, *Debaryomyces phaffii* sp. n., 326
Yeast(s), isolation of, *Hansenula wickerhamii* sp. n., 359
Yeast(s), morphology, at subzero temperatures, 662
Yeasts, phosphomannan-producing, 265, 269
Yeast(s), specific gravity at subzero temperatures, 673
Yeast(s), vaccines against, use of, in experimental tuberculosis, 115

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
July	7/21/61	1–158
August	8/29/61	159–317
September	10/3/61	319–459
October	10/31/61	461–622
November	12/1/61	623–791
December	12/22/61	793–1006

JOURNAL

OF

BACTERIOLOGY

VOLUME 82

BALTIMORE, MD.
1961

EDITORIAL BOARD

WILLIAM B. SARLES, *Editor* (1966)
Department of Bacteriology
University of Wisconsin
Madison 6, Wisconsin

EDWARD A. ADELBERG (1964)
Yale University
310 Cedar St.
New Haven, Connecticut

GEORGE B. CHAPMAN (1964)
Department of Anatomy
Cornell University Medical College
New York 21, New York

WILLIAM J. CROMARTIE (1963)
University of North Carolina Medical School
Chapel Hill, North Carolina

R. D. DEMOSS (1964)
Department of Microbiology
University of Illinois
Urbana, Illinois

A. E. FELLER (1965)
University of Virginia School of Medicine
Charlottesville, Virginia

HOWARD GEST (1964)
Washington University
St. Louis, 5, Missouri

J. O. LAMPEN (1965)
Institute of Microbiology
Rutgers, The State University
New Brunswick, New Jersey

W. D. MCELROY (1962)
Johns Hopkins University
Baltimore 18, Maryland

E. J. ORDAL (1961)
Department of Microbiology
University of Washington
Seattle 5, Washington

A. FREDERICK RASMUSSEN (1964)
University of California School of Medicine
Los Angeles 24, California

HARRY M. ROSE (1964)
Department of Microbiology
Columbia University
College of Physicians and Surgeons
New York 32, New York

LOUIS DS. SMITH (1962)
Department of Botany and Bacteriology
Montana State College
Bozeman, Montana

WILLIS A. WOOD (1962)
Department of Biochemistry
Michigan State University
East Lansing, Michigan

DAVID M. BONNER (1963)

RICHARD DONOVICK, *Treasurer*, The Squibb Institute for Medical Research, New Brunswick, New Jersey

CONTENTS

No. 1, JULY 1961

Taxonomic Relationships among the Pseudomonads. R. R. Colwell and J. Liston ... 1–14
Susceptibility of Suckling Mice to Variola Virus. Ronald G. Marshall and Peter J. Gerone ... 15–19
Amino Acid Interactions in *Neurospora crassa*. Josephine Soboren and Joseph F. Nye ... 20–25
Virulence and Citrulline Ureidase Activity of *Pasteurella tularensis*. Nyven J. Marchette and Paul S. Nicholes ... 26–32
Assay of Poly-β-Hydroxybutyric Acid. John H. Law and Ralph A. Slepecky ... 33–36
Synthesis and Degradation of Poly-β-Hydroxybutyric Acid in Connection with Sporulation of *Bacillus megaterium*. Ralph A. Slepecky and John H. Law ... 37–42
Production of Vibrio El Tor Toxin in a Liquid Medium. Yoshikazu Watanabe and Oscar Felsenfeld ... 43–47
Spontaneous and Mutator-induced Reversions of an *Escherichia coli* Auxotroph. II. Acetylornithinase Activity Associated with the Different Revertant Types. Donald F. Bacon and Henry P. Treffers ... 48–53
Serological Grouping of Actinomyces by Means of Fluorescent Antibodies. John M. Slack, Ann Winger, and Dane W. Moore, Jr. ... 54–65
Studies on Immunity to Toxins of *Clostridium botulinum*. VII. Purification and Detoxification of Trypsin-activated Type E Toxin. Mary A. Fiock, Allen Yarinsky, and James T. Duff ... 66–71
Antibiotic Properties of Acrylic Acid, a Factor in the Gastrointestinal Antibiosis of Polar Marine Animals. John McNeill Sieburth ... 72–79
Relationships between Initial Nutrient Concentration and Total Growth. R. E. Ecker and W. R. Lockhart ... 80–84
Nutrition of *Streptococcus bovis* in Relation to Dextran Formation. Isabel J. Barnes, H. W. Seeley, and P. J. VanDeMark ... 85–93
Enzyme Systems in the Mycobacteria. XI. Evidence for a Functional Glycolytic System. Fernando Bastarrachea, David G. Anderson, and Dexter S. Goldman ... 94–100
Small Colony Variant in *Candida albicans*. Donald E. Bianchi ... 101–105
Fluorescein Amine Media for Rapid Differentiation of Staphylococci. Alexander Kimler ... 106–109
Antibodies against *Staphylococcus aureus* in Nonimmunized Rabbits. Jay O. Cohen, Glenda S. Cowart, and William B. Cherry ... 110–114
Effect of Vaccines Prepared from *Histoplasma capsulatum* and Other Yeasts on Experimental Tuberculosis. Loyd W. Hedgecock ... 115–123
Correlation between Acid Phosphatase and Coagulase Production or Phage Type of *Staphylococcus aureus*. Yue-Liang Pan and Harold J. Blumenthal ... 124–129
Effect of Tungstate on the Uptake and Function of Molybdate in *Azotobacter agilis*. William A. Bulen ... 130–134
Isolation and Preliminary Characterization of Bacteriophages for *Bacillus subtilis*. W. R. Romig and A. M. Brodetsky ... 135–141
Thiamine and Nicotinic Acid: Anaerobic Growth Factors for *Mucor rouxii*. S. Bartnicki-Garcia and Walter J. Nickerson ... 142–148
NOTES:
Pathogenicity of Strains of *Pseudomonas aeruginosa* for Mice. W. L. Gaby and C. Logan ... 149–150
Anhydrous Pullorum Antigen Composite. M. Gershman, H. DeHaas, and H. L. Chute ... 150–151
Inclusion Bodies from Newcastle Disease Virus in HeLa Cells. M. S. Das, and Herbert S. Goldberg ... 151–152
Techniques for the Isolation of *Salmonella typhimurium* from Laboratory Mice. Warren G. Hoag and Judith Rogers ... 153–154

Motility and Flagellation of *Corynebacterium vesiculare* Busing, Doll, and Freytag. E. Bernard Carrier and C. S. McCleskey 154–156
Effect of Variation in Body Temperature on Antibody Production in Rabbits and Mice. J. D. Fenters and W. S. Jeter 156–157

No. 2, August 1961

Complement Fixation Test in Experimental Clinical and Subclinical Melioidosis. Clara Nigg and Margaret M. Johnston 159–168
Effects of Deoxyribonucleic Acid Products on Deoxyribonucleic Acid Synthesis of Virulent and Avirulent Pneumococci. W. Firshein 169–180
Effects of Deoxyribonucleic Acid Products on Respiration of Virulent and Avirulent Pneumococci. W. Firshein 181–186
Relationship between Thymineless Death and Ultraviolet Inactivation in *Escherichia coli*. J. Gallant and S. R. Suskind 187–194
Mechanism of Chemical Mutagenesis. IV. Reaction between Triethylene Melamine and Nucleic Acid Components. Z. Lorkiewicz and Waclaw Szybalski 195–201
Episome-mediated Transfer of Drug Resistance in *Enterobacteriaceae*. III. Transduction of Resistance Factors. Tsutomu Watanabe and Toshio Fukasawa 202–209
Agglutinin-Adsorption Analysis of *Vibrio fetus*. C. V. Reich, C. E. Heist, and H. W. Dunne 210–214
Repression and Inhibition of Indole-synthesizing Activity in *Neurospora crassa*. Gabriel Lester 215–223
Polyol Dehydrogenases of *Azotobacter agilis*. Leon Marcus and Allen G. Marr 224–232
Acetate Formation in *Clostridium acidi-urici*: Acetokinase. Richard D. Sagers, Moshe Benziman, and I. C. Gunsalus 233–238
Mycoplasma inocuum Sp. N., a Saprophyte from Chickens. H. E. Adler, M. Shifrine, and Herrad Ortmayer 239–240
Taxonomically Significant Color Reactions of *Brevibacterium linens*. Nicholas Grecz and Gail M. Dack 241–246
Inhibition of Algae by Nystatin. J. O. Lampen and Peter Arnow 247–251
Endogenous Respiration of *Bacillus cereus*. C. E. Clifton and J. M. Sobek 252–256
Effect of Exposure of Bacteria to Endotoxin on Their Susceptibility to the Lethal Action of Normal Serum. J. Gabriel Michael and Maurice Landy 257–264
Phylogeny of Phosphomannan-producing Yeasts. I. The Genera. Lynferd J. Wickerham and Kermit A. Burton 265–268
Phylogeny of Phosphomannan-producing Yeasts. II. Phosphomannan Properties and Taxonomic Relationships. M. E. Slodki, Lynferd J. Wickerham, and M. C. Cadmus 269–274
Fate of Partially Purified C^{14}-labeled Toxin of *Clostridium perfringens*. Paul D. Ellner 275–283
Experimental Shigella Infections. V. Studies in Germ-free Guinea Pigs. Samuel B. Formal, Gustave Dammin, Helmuth Sprinz, Donald Kundel, Herman Schneider, Richard E. Horowitz, and Martin Forbes 284–287
Metabolism of Animal Cells Infected with Mycoplasma. Dorothy M. Powelson 288–297
Staphylococcal Penicillinase. I. Inhibition and Stimulation of Activity. Arthur K. Saz, Delores L. Lowery, and Leah J. Jackson 298–304
Effect of L-Cystine on Initiation of Anaerobic Growth of *Escherichia coli* and *Aerobacter aerogenes*. Luigi Gorini 305–312
NOTES:
Antigenic Relationship between *Hafnia* and *Shigella flexneri*. E. van Oye and G. Ghysels 313
Role of H_2O_2 in the Photooxidative Killing of Blue-Green Mutants of *Rhodopseudomonas spheroides*. Roderick K. Clayton 314–315
Laboratory Maintenance of *Toxoplasma gondii*. Robert G. Blaker 315–316
Spontaneous Appearance of Sectored Colonies in *Staphylococcus aureus* cultures. Manuel Servin-Massieu 316–317

No. 3, September 1961

Differentiation of Brucellae by the Aid of Phages. *József* Parnas 319–325
Debaryomyces phaffi Sp. N., a New Yeast Isolated from a Finnish Soil. Augusto Capriotti 326–330
Behavior of Bacterial Spores in Aqueous Polymer Two-Phase Systems. L. E. Sacks and Gordon Alderton 331–341
Lysis of Brucellae by the Combined Action of Glycine and a Lysozyme-like Agent from Rabbit Monocytes. Doris J. Ralston, B. S. Baer, and S. S. Elberg 342–353
Glutamic Decarboxylase of Ergot, *Claviceps purpurea*. John A. Anderson, Vernon H. Cheldelin, and Tsoo E. King 354–358
Hansenula wickerhamii Sp. N., a New Yeast from Finnish Soil. Augusto Capriotti 359–360
Competitive Relationship between Protocatechuic Acid and *p*-Aminosalicylic Acid for a Cellular Transport Mechanism. Jerry S. Hubbard and Norman N. Durham 361–369
Fatty Acid Metabolism in *Serratia marcescens*. I. Oxidation of Saturated Fatty Acids by Whole Cells. D. G. Bishop and J. L. Still 370–375
Pathway for the Dissimilation of Itaconic and Mesaconic Acids. Vernon Brightman and William R. Martin 376–382
Factors Affecting Aspartase Activity. Robert H. Depue and Albert G. Moat 383–386
Metabolic Characterization of the Genus *Brucella*. I. Statistical Evaluation of the Oxidative Rates by Which Type I of Each Species Can Be Identified. Margaret E. Meyer and H. S. Cameron 387–395
Metabolic Characterization of the Genus *Brucella*. II. Oxidative Metabolic Patterns of the Described Biotypes. Margaret E. Meyer and H. S. Cameron 396–400
Metabolic Characterization of the Genus *Brucella*. III. Oxidative Metabolism of Strains That Show Anomalous Characteristics by Conventional Determinative Methods. Margaret E. Meyer 401–410
Action of Penicillin on *Aerobacter cloacae*. W. B. Hugo and A. D. Russell 411–417
Large Cell Stage in the Genus *Bacillus*. Roy M. Johnson 418–424
Isolation and Characterization of Deoxyribonucleic Acid from a Strain of *Staphylococcus aureus*. Hans Blobel 425–429
Some Factors Which Affect the Initiation of Growth of *Cryptococcus neoformans*. Dexter H. Howard 430–435
Method for the Selection of Bacteria that Synthesize Uronic Acid-Containing Polysaccharides. Alvin Markovitz 436–441
Formation of Nitrite and Nitrate by Actinomycetes and Fungi. P. Hirsch, L. Overrein, and M. Alexander 442–448
Growth of Venezuelan Equine Encephalomyelitis Virus in L Cells. II. Growth in Submerged Culture. Frank M. Hardy and Arthur Brown 449–457
NOTE:
Improved Method for Titration of Influenza Virus Hemagglutinin in the Lungs of Infected Mice. J. M. Bowen and K. S. Pilcher 458–459

No. 4, October 1961

Genetic Modifiers of Streptomycin Resistance in Pneumococcus. Betty E. Bryan 461–470
Enzymatic Expression of Genetic Units of Function Concerned with Galactose Metabolism in *Escherichia coli*. Richard L. Soffer 471–478
Nonsaponifiable Lipids of Representative Pleuropneumonia-like Organisms. George H. Rothblat and Paul F. Smith 479–491
Oxidative Activity of Psychrophilic and Mesophilic Bacteria on Saturated Fatty Acids. Barnet M. Sultzer 492–497
Variation of Herpes Simplex Virus in Persistently Infected Tissue Cultures. Harry C. Hinze and Duard L. Walker 498–504
Bacterial Dissimilation of Streptomycin. Dolph Klein and David Pramer 505–510
Specific Effect of Limiting Nutrient on Physiological Events during Culture Growth. R. E. Ecker and W. R. Lockhart 511–516

Biological and Chemical Studies on Mycobacteria. Relationship of Colony Morphology to Mycoside Content for *Mycobacterium kansasii* and *Mycobacterium fortuitum*. G. B. Fregnan, D. W. Smith, and H. M. Randall 517–527
Growth of *Listeria monocytogenes* in Defined Media. Mischa E. Friedman and William G. Roessler 528–533
Labeling Procedures Employing Crystalline Fluorescein Isothiocyanate. Charles W. Griffin, Theodore R. Carski, and George S. Warner 534–537
Citric Acid Fermentation of Sugars Purified with Chelating Resin. Yuichi Noguchi and Marvin J. Johnson 538–541
Antigenic Properties of Pleuropneumonia-like Organisms from Tissue Cell Cultures and the Human Genital Area. Jack S. Bailey, Harold W. Clark, William R. Felts, Richard C. Fowler, and Thomas McP. Brown 542–547
Bacterial Dissimilation of L-Fucose and L-Rhamnose. R. G. Eagon 548–550
Role of Potassium in the Oxidative Metabolism of *Micrococcus sodonensis*. Jerome J. Perry and James B. Evans 551–555
Determination, by Spodography, of the Intracellular Distribution of Mineral Matter throughout the Life History of *Bacillus cereus*. Georges Knaysi 556–563
New Solid Medium for Enhanced Growth of *Pasteurella tularensis*. Andrew J. Gaspar, Hugh B. Tresselt, and Martha K. Ward 564–569
Antigenic Studies of Candida. I. Observation of Two Antigenic Groups in *Candida albicans*. H. F. Hasenclever and William O. Mitchell 570–573
Antigenic Studies of Candida. II. Antigenic Relation of *Candida albicans* Group A and Group B to *Candida stellatoidea* and *Candida tropicalis*. H. F. Hasenclever, William O. Mitchell, and Joseph Loewe 574–577
Antigenic Studies of Candida. III. Comparative Pathogenicity of *Candida albicans* Group A, Group B, and *Candida stellatoidea*. H. F. Hasenclever and William O. Mitchell 578–581
Factors Affecting the Elaboration by *Clostridium histolyticum* of Proteinases Capable of Debriding Third Degree Burn Eschars on Guinea Pigs. Sanford Berman, Joseph P. Lowenthal, Marion E. Webster, Patricia L. Altieri, and Raymond B. Gochenour 582–588
Large Scale Purification of Proteinases from *Clostridium histolyticum* Filtrates. David A. Conklin, Marion E. Webster, Patricia L. Altieri, Sanford Berman, Joseph P. Lowenthal, and Raymond B. Gochenour 589–594
Fermentation Reactions of *Erysipelothrix rhusiopathiae*. Thomas G. White and Richard D. Shuman 595–599
Role of Valine and Isoleucine as Regulators of Actinomycin Peptide Formation by *Streptomyces chrysomallus*. Edward Katz, Clarence R. Waldron, and Mary Lou Meloni 600–608
Glucose Dehydrogenation in Bacteria: A Comparative Study. Jens G. Hauge 609–614
NOTES:
Effect of Sulfadiazine on the Synthesis of Demethylchlortetracycline by *Streptomyces aureofaciens*. Joseph J. Goodman and Mary Matrishin 615
Nicotinic Acid Requirements of *Candida pseudotropicalis*. G. E. Foley, W. D. Winter, Jr., and H. D. Riley 616–617
Oxidation of Metadihydroxyphenols by Enzymes of *Piricularia oryzae*. David Stefanye 617–618
New Indole Test Requiring Only Simple Reagents. Miguel Gracián 618
Comparison of Two Methods of Floor Culture. Ruth B. Kundsin, Carl W. Walter, and Mary Ann Cecere 619
Preparation of Cell-free Extracts of Staphylococcal Penicillinase. Harry G. Steinman 620–621
Production of Discrete, Nonswarming Colonies by Proteus on Medium Deficient in Sodium Chloride and Other Salts. S. Stanley Schneierson 621–622

No. 5, NOVEMBER 1961

Utilization of Pyrimidines and Pyrimidine Deoxynucleosides by *Thermobacterium acidophilum* (*Lactobacillus acidophilus*). Soren Lovtrup and David Shugar 623–631

Antigenic Structure and Serological Relationships of *Mycobacterium*, *Actinomyces*, *Streptococcus*, and *Diplococcus*. Jerzy B. Kwapinski and Marshall L. Snyder 632–639
Unsaturated Amino Acids. V. Microbiological Properties of Some Halogenated Olefinic Amino Acids. Jacob Shapira and Karl Dittmer 640–647
Chemical Studies on Cellular Components of *Bordetella pertussis*. I. Purification and Properties of Agglutinogen. Kaoru Onoue, Masayasu Kitagawa, and Yuichi Yamamura 648–656
Phthiocol and Menadione as Acetate-Replacing Factors for *Lactobacillus delbrueckii*. Frank M. MaciasR 657–661
Manifestations of Injury in Yeast Cells Exposed to Subzero Temperatures. I. Morphological Changes in Freeze-Substituted and in "Frozen-Thawed" Cells. Peter Mazur 662–672
Manifestations of Injury in Yeast Cells Exposed to Subzero Temperatures. II. Changes in Specific Gravity and in the Concentration and Quantity of Cell Solids. Peter Mazur 673–684
Enthalpy Changes Associated with the Lactic Fermentation of Glucose. W. W. Forrest, D. J. Walker, and M. F. Hopgood 685–690
Effects of Some Mechanical Factors on the Endospores of *Bacillus subtilis*. Georges Knaysi and Harold R. Curran 691–694
Unusual Ribosome Particles Occurring during Spore Germination. Carl R. Woese 695–701
Subclinical Infection of Dogs by Canine-Adapted Measles Virus Evidenced by Their Subsequent Immunity to Canine Distemper Virus. Roberto A. Moura and Joel Warren 702–705
L-Alanine Dehydrogenase: A Mechanism Controlling the Specificity of Amino Acid-Induced Germination of *Bacillus cereus* Spores. R. J. O'Connor and Harlyn O. Halvorson 706–713
Polysaccharide of *Coccidioides immitis*. D. Pappagianis, E. W. Putman, and G. S. Kobayashi 714–723
Utilization of Sulfur Compounds by *Streptococcus bovis*. J. M. Prescott 724–728
Preparation of a Fluorescent Antibody Specific for the Yeast Phase of *Histoplasma capsulatum*. Leo Kaufman and William Kaplan 729–735
Studies of Streptococcal Cell Walls. VI. Effects of Adjuvants on the Production of Type-Specific Antibodies to Cell Walls and Isolated M Protein. James A. Hayashi and Gerald Walsh 736–742
Permeability of Bacterial Spores. I. Characterization of Glucose Uptake. S. H. Black and Philipp Gerhardt 743–749
Permeability of Bacterial Spores. II. Molecular Variables Affecting Solute Permeation. Philipp Gerhardt and S. H. Black 750–760
Synthesis of Serine by *Coxiella burnetii*. W. F. Myers and D. Paretsky 761–763
Glucose Uptake and Dissimilation by X-Irradiated, Starved, and Division-Inhibited Yeast. Edward Spoerl and C. W. Quiner 764–769
Staphylococcal Muller Phenomenon: Relationship to the Plasminogen-Plasmin System. Paul G. Quie and Lewis W. Wannamaker 770–783
NOTES:
Influence of Temperature and pH on Heterogenetic Bacterial Antigen. E. A. Gorzynski and E. Neter 784–785
Role of Metals in Manometric Studies with *Cephalosporium longisporum*. Henry D. Isenberg, Michael A. Pisano, and Lawrence N. Rappaport 785–787
Identification of Apyocyanogenic Strains of *Pseudomonas aeruginosa*. X. Bühlmann, W. A. Vischer, and H. Bruhin 787–788
Surface-Active Substances Produced by *Thiobacillus thiooxidans*. Galen E. Jones and Robert L. Starkey 788–789
A Batch-Type Concentration and Purification Procedure for Poliovirus Complement Fixing Antigen. Morris T. Suggs, Jr., Helen L. Casey, Diane D. Sligh, Andrew R. Fodor, and William F. McLimans 789–791
Ortho-Phthalic Acid from Bacterial Spores—An Artifact. P. H. Hodson and J. W. Foster 791

No. 6, DECEMBER 1961

Survey of Fourteen Metabolic Inhibitors for Their Effect on Endospore Germination in *Bacillus subtilis*. Harold R. Curran and Georges Knaysi 793–797
Evidence for the De Novo Synthesis of the Alpha-Amylase of *Pseudomonas saccharophila*. Jerome M. Eisenstadt and Harold P. Klein 798–807
Spheroplasts of the Yeast *Candida utilis*. G. Svihla, F. Schlenk, and J. L. Dainko 808–814
Growth of Shigellae in Monolayer Tissue Cultures. Dolores F. Gerber and H. M. S. Watkins 815–822
Effect of Ammonium Ion on Growth and Metabolism of *Micrococcus sodonensis*. J. N. Campbell, James B. Evans, Jerome J. Perry, and C. F. Niven, Jr. 823–827
An Extracellular Material Elaborated by *Micrococcus sodonensis*. J. N. Campbell, James B. Evans, Jerome J. Perry, and C. F. Niven, Jr. 828–837
Sialic Acids (*N*,7-O-Diacetylneuraminic Acid and *N*-Acetylneuraminic Acid) in *Escherichia coli*. I. Isolation and Identification. Charles W. DeWitt and Janet A. Rowe 838–848
Sialic Acids (*N*,7-O-Diacetylneuraminic Acid and *N*-Acetylneuraminic Acid) in *Escherichia coli*. II. Their Presence on the Cell Wall Surface and Relationship to K Antigen. Charles W. DeWitt and Elizabeth A. Zell 849–856
Cell Multiplication Studies with an Electronic Particle Counter. G. Toennies, L. Iszard, N. B. Rogers, and G. D. Shockman 857–866
Role of One-Carbon Precursors in the Biosynthesis of Deoxyribonucleic Acid in Bacteriophage-Infected and Growing Cells of *Escherichia coli*. Eugene W. Nester and John Spizizen 867–874
Transduction of Resistance to Chlortetracycline and Novobiocin in *Staphylococcus aureus*. P. A. Pattee and J. N. Baldwin 875–881
Influence of a Bacterial Cell Extract upon the Morphogenesis of *Arthrobacter ureafaciens*. L. C. Blankenship and R. N. Doetsch 882–888
Alterations in the Permeability of *Neurospora crassa* due to Polyene Antibiotics. Stephen C. Kinsky 889–897
Induction and Repression of Nitrate Reductase in *Neurospora crassa*. Stephen C. Kinsky 898–904
Noninductive Metabolism of Itaconic Acid by *Pseudomonas* and *Salmonella* Species. William R. Martin, Frank Frigan, and Edna H. Bergman 905–908
Ionic Requirements of *Treponema pallidum*. III. Divalent Ions. G. O. Doak, Leon D. Freedman, and John W. Clark, Jr. 909–912
Taxonomic Analysis with the Electronic Computer of Some *Xanthomonas* and *Pseudomonas* Species. R. R. Colwell and J. Liston 913–919
Immunochemistry of Pneumococcal Types II, V, and VI. II. Inhibition Tests in the Type VI Precipitating System. Paul A. Rebers, Esther Hurwitz, and Michael Heidelberger 920–926
Studies on Thermophilic Sulfate-Reducing Bacteria. II. Hydrogenase Activity of *Clostridium nigrificans*. J. M. Akagi and L. Leon Campbell 927–932
Enzymatic Basis for Assimilatory and Dissimilatory Sulfate Reduction. H. D. Peck, Jr. 933–939
Pesticins. I. Pesticin-Bacterium Interrelationships, and Environmental Factors Influencing Activity. Robert R. Brubaker and Michael J. Surgalla 940–949
Metabolic Characterization of the Genus *Brucella*. IV. Correlation of Oxidative Metabolic Patterns and Susceptibility to *Brucella* Bacteriophage, Type *abortus*, Strain 3. Margaret E. Meyer 950–953
Role of Citritase in Acetoin Formation by *Streptococcus diacetilactis* and *Leuconostoc citrovorum*. R. J. Harvey and E. B. Collins 954–959
Chemical Composition and Heat Resistance of Some Aerobic Bacterial Spores. Homer W. Walker, Jack R. Matches, and John C. Ayres 960–966
Influence of Osmotic Pressure on the Morphology of the Reiter Treponeme. Paul H. Hardy, Jr. and E. Ellen Nell 967–978
Interference between Viable Strains of Newcastle Disease Virus. D. P. Durand 979–983
Lysogeny in Staphylococci. John E. Blair and Miriam Carr 984–993

NOTES:
Response of *Candida albicans* to Glucosamine and Some Related Compounds. Stewart A. Koser and Ilse Tribby 994–995
An Apparatus for Automatic Inoculation of Bacterial Cultures. A. Kohn 995–996
Index of Authors 997–999
Index of Subjects 1000–1006
Index of Date of Issue 1006
Instructions to Authors 3–4
